### eBook rights & pricing

#### How to enter rights & pricing information

1. Sign in to your KDP account and go to your **Bookshelf**.
2. Under the KINDLE EBOOK ACTIONS menu, click the ellipsis button (“…”).
3. Select “Edit eBook Pricing.”
4. In the “KDP Select Enrollment” section, tell us if you want to enroll your book in KDP Select.
5. In the “Territories” section, tell us if you have all rights necessary to make your eBook available worldwide. If your book is your original content and you’re publishing it for the first time, you most likely hold worldwide rights.
  - If you do, select **All territories (worldwide rights)**
  - If you don’t, select **Individual territories**
6. In the “Royalty and Pricing” section, select a royalty plan and enter your list price. You have three options for setting your list price:
  - Choose your primary marketplace and set your list price in the currency of that marketplace. We'll automatically convert the price to our available currencies. If you choose this option, books with prices that match in one market may not always match in other markets. This is due to variations in taxes, delivery costs, and other operating costs.

- Enter a specific amount by marketplace and available currency.
- Use KDP Pricing Support (Beta). This optional service shows the impact of changes in KDP book prices on number of books sold and author earnings.

**Note:** There are minimum and maximum list price requirements depending on marketplace, royalty plan, and file size. You can see the minimum and maximum prices under the “List Price” field. You can’t list your book for free, but it’s possible to run a free promotion later.

7. In the “Matchbook” section, tell us if you want to enroll in Kindle Matchbook.
8. In the “Book Lending” section, tell us if you want to allow Kindle Book Lending.
9. Read our Terms & Conditions and if you agree, click **Publish Your Kindle eBook**.
