

You can add photos to a message you are sending so you can share the photos with your friends and family.

Will photos I add to a message be available on the Internet?

If you are signed in to Windows Live Mail with a Windows Live ID, high-quality versions of the photos you add to a message will be placed on the Internet when you send the message. When a person receives the message, they can view the high-quality photos in an online slideshow. The message will display smaller versions of the photos so the message transfers faster.

Note: A Windows Live ID is the e-mail address and password you use to sign in to Windows Live programs and services, such as Windows Live Hotmail.

How do I send a file with a message?

To send a document, spreadsheet, video, or other type of file with a message, create your message and then click **Attach** at the top of the window. In the dialog box that appears, click the file you want to attach and then click **Open**. The name and size of the file you select will appear below the Subject area in the message.

ADD PHOTOS TO A MESSAGE

1 To create a message, perform steps 1 to 7 starting on page 228.

2 Click the location in the message where you want to add photos.

3 Click **Add photos** to add photos to the message.

■ The Add Photos dialog box appears.

■ This area shows the location of the displayed photos. You can click this area to select a different location.

4 Click a photo you want to add to the message.

5 Click **Add** to add the photo to the message.

■ The photo you selected appears in the message.

6 To add additional photos to the message, repeat steps 4 and 5 for each photo you want to add.

7 When you are finished adding photos to the message, click **Done**.

■ The photos you selected appear in the message.

■ This area displays options you can select to format your photos. For example, you can add borders to your photos and change your photos to black and white.

8 When you are ready to send the message, click **Send** to send the message.
