

# Logitech TV Cam

Use the Logitech TV Cam to make widescreen, 720p high-definition video calls right from your HDTV.

Just add the Logitech TV Cam to your Logitech Revue with Google TV system and sit back, relax and video chat.

## Noteworthy Features

- High-def video calls on your HDTV without a computer
- Widescreen HD (720p) resolution
- On-screen notification and caller ID
- Wide-angle lens
- Call any webcam for free
- 5x digital zoom and autofocus
- 2.4 GHz wireless connectivity
- Works with Google TV systems, including Logitech Revue

**High-def video calls right from the couch.** The Logitech TV Cam connects to Logitech Revue with Google TV so you can make and receive high-definition video calls on your HDTV without a computer. Now you can say hello to long distance family and friends from the comfort of your couch.

*Make calls from the couch.*

## Call Anyone, Anywhere for Free

With the Logitech TV Cam you can call any webcam, anywhere in the world right from your HDTV. No one time or monthly fees. It's free as long as everyone's using the free Vid HD software—on a Mac, PC, or another Logitech Revue.

- See clearly with widescreen, HD (720p) video resolution
- Know who's calling with on-screen notification and caller ID
- Get up close and personal with 5x digital zoom
- See it all with wide-angle lens
- Enjoy razor-sharp images with Carl Zeiss® optics
- Hear clearly with two digital directional microphones to reduce noise and echoes

*Widescreen, HD-quality video calling.*

*Connecting is as easy as making a call.*

*Pan, tilt and zoom for the perfect picture.*

## To receive high-definition video:

You must have a minimum download speed of 1 Mbps. The other person must have an HD-capable webcam and a minimum upload speed of 1 Mbps

## To transmit high-definition video:

You must have a minimum upload speed of 1 Mbps

## What You Need

- Logitech Revue with Google TV
