

To enjoy maximum pleasure from your Philips docking speakers, make sure your Android phone meets the following specifications

1. Android version 2.1 or above

Go to **Home page** ► **Menu** ► **Settings** ► **About Phone** ► **'Firmware version', 'Software information'** or **'Android version'** to check the Android version of your phone. Please note that the settings may vary from model to model.

If the micro USB connector on your phone is located on the top, you will need to upgrade to Android version 2.3 or above in order to correctly display the 'Fidelio app' as shown below.

2. Bluetooth-enabled

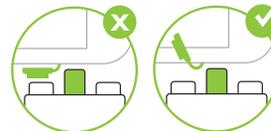

Go to **Home page** ► **Menu** ► **Settings** ► **Wireless network** ► **Bluetooth** (Yes/No) to check if your phone supports Bluetooth. Please note that the settings may vary from model to model.

3. Micro USB connector for charging

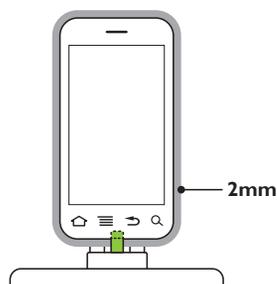

Applicable for Android phones with no protruding buttons near the micro USB connector
This is to prevent from accidental activation during docking.

If your phone has a micro USB socket cover, flip it outwards as shown below to dock.

Dock your Android phone in its case:

The FlexiDock can accommodate phones with protective case of up to 2mm thick.

Charge second device via rear USB:

Applicable for AS851 and AS351 docking speakers only.

You may charge a second phone or tablet via the USB socket at the back at the same time.
