

With HP TrueVision adaptive lighting technology, high-quality autofocus, and full HD 1080p resolution, the HP Webcam HD-4110 makes it easy to create professional-quality videos for the web.

Ready to launch a video blog about your favorite high-tech gadgets? Want to post your own music video for your fans? Whatever you want to share with the world, now you can easily create high-quality videos for the web with the HP Webcam HD-4110. You can also take advantage of easy one-touch video chat features that include HD imaging and built-in adaptive lighting. With full HD 1080p resolution and HP TrueVision technology, you can look your best in videos and photos, right from your own computer.

Look like a pro.

Ready to launch a video blog about your favorite high-tech gadgets? Want to post your own music video for your fans? Whatever you want to share with the world, now you can easily create high-quality videos for the web with the HP Webcam HD-4110. You can also take advantage of easy one-touch video chat features that include HD imaging and built-in adaptive lighting. With full HD 1080p resolution and HP TrueVision technology, you can look your best in videos and photos, right from your own computer.

Broadcast your best.

The HP Webcam HD-4110 with HP TrueVision technology lets you tell your story in full high-definition 1080p high-definition at 30 frames per second, even in low-light conditions. High-quality autofocus keeps you looking sharp by focusing on the subject—not the background. Built-in adaptive lighting automatically adjusts for changing light conditions, while automatic white balance allows for true-to-life color. The 16 x 9 widescreen glass lens lets you broadcast the full story, and built-in face tracking puts you in the center of the frame. A built-in directional digital microphone filters out unwanted background noise. And with 13-megapixel photo resolution, you can capture outstanding still pictures, too.⁽²⁾

Your personal camera crew—and studio audience.

With just the click of a button⁽⁴⁾ on the HP Webcam HD-4110, you can begin recording video and upload it to YouTube™.⁽¹⁾ There's no software application launch required. Two other quick launch buttons let you snap a photo or instantly begin a live video chat. With one touch of the programmable chat button,⁽⁴⁾ you can choose from AIM™, Skype®, Windows® Live Messenger, or Yahoo!® Messenger.⁽³⁾⁽¹⁾ Even better, the HP Webcam HD-4110 remembers your preference and automatically launches it the next time. Included software lets you do even more: record video and take photos with ArcSoft Webcam Companion® 3 then enhance them with masques, frames, and filter effects using Magic-i™ Visual Effects 2; or combine photos and videos into a multi-media gallery for even more creative blog postings with ShowBiz. For security use, remote monitoring software automatically records any motion the webcam detects while you're away.

Ready. Steady. Go.

The HD-4110 puts you in control of any situation. A versatile clip lets you securely mount the webcam almost anywhere—wrap it around your monitor, bend it to sit on your desk, mount it on your notebook, stand it on a table. No matter where you are, 360-degree rotation plus tilt lets you position the camera to show off your best side.
