Clothing & Accessories (Approval is required to sell in this category)

To be successful selling Clothing & Accessories, accurate data is crucial to ensuring that customers will be able to find and purchase your products. Providing a clear and concise listing that follows a consistent format will better inform customers and enhance the discoverability of your products. This can result in increased traffic to your product listings.

Before going any further into how to maximize your business, let’s first identify which products should be listed in the Amazon Clothing Store:

- **Women’s (including Juniors’), and Girls’**: Tops, Sweaters, Bottoms (Pants, Capris, Leggings, Jeans, Skirts, Shorts), Dresses, Blazers and Jackets, Outerwear, Suits, Jumpsuits, Rompers and Overalls, Athletic Wear, Maternity Clothing, Intimate Apparel and Underwear, Sleepwear, Swimwear, Socks and Hosiery
- **Men’s (including Young Men’s), and Boys’**: Tops, Sweaters, Bottoms (Pants and Shorts), Blazers and Jackets, Outerwear, Suits, Tuxedos, Underwear, Sleepwear, Swimwear, Socks
- **Accessories**: Belts, Suspenders, Men/Boys’ Wallets, Shawls and Pashminas, Neckties and Bow ties, Gloves, Scarves, Hats, Mittens
- **Baby Boys’, Baby Girls’, and Unisex-Baby’s**: Layette Sets, Bodysuits, Rompers, Dresses, Bottoms, Tops, Sleepwear including Sleepers, Clothing Sets, Hats, Mittens, Sweaters, Outerwear, Snowsuits, Bibs
- **Costumes and Costume Accessories in adult or infant sizes**
- **Exotic Apparel and Accessories**
- **Related products that are listed in other categories (not in Apparel) include**:
  - Children’s Costumes, listed in the Toys category year-round
  - Handbags and Women’s Wallets, listed in Shoes
  - Sunglasses, listed in Shoes

**Note**: Related products should not be listed in Clothing using the Clothing Accessories template. Please download the appropriate inventory file template for each category.
Title Style

Your product title is the first thing customers see when visiting your detail page. Does your title provide the customer with the right information? Will they continue looking at your product offering?

Amazon uses the words in product titles to display your products in search results. A concise (maximum length of 80 characters) and relevant title will drive traffic to your product. Always check titles for consistent format and accuracy. Follow the guidelines below to create product titles that make a good first impression.

Tips on how to create a great title

Elements to Concatenate for Titles

For the Parent of Variation Products:
[Brand] + [department/ (and Special Size, if applicable)] + [product name]:

For Stand Alone or Child Products:
[Brand] + [department/ (and Special Size, if applicable)] + [product name] + [size] + [color]

Valid departments* for the title include: Women’s, Men’s, Juniors, Big Girls’, Big Boys’, Little Girls’, Little Boys’, Baby Girls’, Baby Boys’ & Unisex Baby

*Note that the following are not valid departments for the title: Unisex Adult, Youth, Unisex Child, Teen, Kids, Child, etc.

Brand & Manufacturer

Brand information allows the customer to determine the model and brand of the product offered. These fields improve the specificity of your data listings. Custom brand-based size charts for Clothing are also dependent on these fields.

Note:

- Do not use your seller name for manufacturer or brand unless your product is Private Label.
- Do not use a distributor or drop ship vendor name for brand unless they are the manufacturer.
- The brand associated with the product ID (i.e. UPC, EAN) must match the actual brand of the product.
Key Product Features

The Key Product Features bullets on the detail page tell the customer the details of your product and can influence the customer purchase decision. The description helps customers evaluate a product, so any non-product-specific information can distract from a customer’s purchase decision. Customers use this section to get a snapshot of the product. They may use this section to finalize a purchase decision or it may interest them enough so they will then read the full product description.

- Highlight the five key features you want customers to consider. We recommend the following material, care instructions, fit, quantity in package, dimensions, country of origin, and so on.
- Maintain a consistent order. If your first bullet point of your first product is material, keep that same order for all your products.
- Reiterate important information from the title and description
- Begin each bullet point with a capital letter
- Write with sentence fragments and do not include ending punctuation
- Do not include promotional and pricing information
- Do not include shipping or company information. Amazon policy prohibits including seller, company, or shipping information

<table>
<thead>
<tr>
<th>Content</th>
<th>Example: Feature Bullets</th>
</tr>
</thead>
<tbody>
<tr>
<td>Materials</td>
<td>100% organic cotton</td>
</tr>
<tr>
<td>Care Instructions</td>
<td>Machine wash warm, tumble dry; Dry clean only; Hand wash, hang to dry</td>
</tr>
<tr>
<td>Fit</td>
<td>Slim fit; Authentic fit - not too fitted, not too loose</td>
</tr>
<tr>
<td>Quantity in Package</td>
<td>6 pack</td>
</tr>
<tr>

<td>Tapered leg with 16 1/2&quot; leg opening</td>
</tr>
<tr>
<td>Specific product benefit</td>
<td>Interior security pocket; Smooth and slims entire waistline; Radial sleeves for easier arm movement</td>
</tr>
<tr>
<td>Country of Origin</td>
<td>Made in China</td>
</tr>
</tbody>
</table>

Note: Tips to improve readability
- Write all numbers as numerals
- Separate phrases in one bullet with semicolons
- Spell out measurements such as quart, inch, feet, and so on
- Material Fabric will automatically display as a bullet point if a value is provided for the Fabric Type attribute in the inventory file. Do not include the material fabric as a bullet, which will create duplicate Fabric bullet points.

Do Not:
- Use hyphens, symbols, periods, or exclamation points
- Write vague statements; be as specific as possible with product features and attributes
- Enter company-specific information; this section is for product features only
Examples:

**Good** – Pants:

**Product Features**

- Sits low on hip, loose seat and thigh
- 19 1/2" leg opening
- Machine washable

**Good** – Shirts:

**Product Features**

Product Descriptions

As you describe your product, you might want to include some key features listed in your bullet points. However, go beyond a simple to-the-point description. Well-written product descriptions help the customer imagine the experience of owning or handling your product. Put yourself in your customers' shoes: what would they want to feel, touch, ask, and want? Incorporating information about the feel, usage and benefits of your product can fire the customer's imagination. This is as close as you can come to creating an in-store experience. Product Descriptions are limited to 2000 characters.

<table>
<thead>
<tr>
<th>Do</th>

Examples

**Good**

**Product Description**

Our Cashmere V-neck is the perfect combination of luxury and versatility. Starting with the fleece — the world's finest from Inner Mongolia. It's tightly spun into a fine yarn and knit into a fabric that's incomparably smooth and durable. The higher V-neck accommodates a necktie easily and layers comfortably over a dress shirt. Looks great under a blazer too. Subtle refinements include perfectly balanced rib knitting at the cuffs and bottom. Each sweater is knit to size, one panel at a time, and then grafted together by hand for a naturally comfortable fit. 100% cashmere. Dry clean or hand wash. Imported.

**Product Description**

To create our Microfiber Raincoat, we took densely-woven polyester twill fabric and put it through a process called "sanding" to give it a nice, soft texture. On top of that, the fabric itself is naturally wrinkle-resistant, so this coat maintains a smooth look even after packing. With sealed seams and the fabric's waterproof properties you won’t have to worry about water sneaking in. 100% polyester. Machine wash. Imported.

**Bad**

Images

Good Images are Important to Your Products’ Success

In an online store, the product image is one of your most valuable marketing tools. When customers browse Amazon.com pages, often the image draws them to consider your product. In addition, with so many choices available for online purchases, a well-formed image can set your product apart from the others. Poor quality images turn customers away.

Use your product images to communicate the selling points and features of your products, to inform and interest customers, and reinforce your brand. Every SKU must have a main image. Learn more about Amazon’s Image Requirements and the Clothing Store’s Image Best Practices below and in Seller Central Help.

Understand the Types of Images

Amazon.com can display several images for each product in the catalog. As a seller, it is in your interest to provide several high-resolution product images for your products so that customers can make informed buying decisions. Listings with missing images are suppressed from the site, thereby getting low customer traffic and conversion rates, resulting in missed sales opportunities. You can use four types of images to illustrate your products:

- **Parent SKU main image**: Only one main image is used per parent product. You must supply a parent main image.
- **Child SKU main image**: Used to show a view of the product in the specific color for the given child SKU. The main image for the child SKU shows in the image pop-up window and on the Browse page; when customers click the smaller picture, the full-size picture appears in a pop-up window. Each child SKU has just one main image, representing the child product in the specified color. You must supply a child main image that matches the color for every item that you sell.
- **Alternate images**: Used to show different views of the product to help clarify use, detail, fabric, cut, etc. You can supply up to eight alternate images for each parent or child SKU. The alternate image for a parent product appears in the image pop-up window. If a customer clicks a specific color in the image pop-up window (for example, a blue sample), then the pop-up window shows the alternate image for the "blue" SKU. The first alternate image (PT01) is also used for the “back” or rotating view on a Browse page for certain category lines.

**Main Parent and Main Child Image Requirements**

Your product images must meet certain technical and style requirements. **Failure to meet those requirements could result in the suspension of your seller account.**

**Technical Image Requirements**

<table>
<thead>
<tr>
<th>Required</th>
<th>Prohibited</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Image must truly represent the product being sold</td>
<td>• Colored backgrounds or lifestyle images</td>
</tr>
<tr>
<td>• Background must be white (RGB 255, 255, 255; hex #FFFFFF)</td>
<td>• Product images photographed on mannequin or digitally modified images</td>
</tr>
<tr>
<td>• Women’s &amp; Men’s Clothing must be photographed on model or flat</td>
<td>• Brand tags or packaging in any of the images</td>
</tr>
<tr>
<td>• Women’s &amp; Men’s Accessories must be photographed flat including scarves, belts, hats, ties &amp; cold weather accessories</td>
<td>• Images of second hand or slightly used products</td>
</tr>
<tr>
<td>• All Kids &amp; Baby items should be photographed flat and not on a model</td>
<td>• Borders, Logos, watermarks, text, color blocks, or other decorations</td>
</tr>
<tr>
<td>• Main images are required for both Parent and Child SKUs</td>
<td>• Sketches or drawings of the product; use real images only</td>
</tr>
<tr>
<td>• All color variations must include a “child SKU main image” representative of that specific color</td>
<td>• Main images of the back of the product</td>
</tr>
<tr>
<td>• Main image must be of a single product, not stacks or images containing multiple products</td>
<td>• Main image with model sitting or lying down</td>
</tr>
<tr>
<td>• Alternate images can be different angles or views, swatches, etc., but must adhere to the same image quality/size guidelines</td>
<td>• Main image with a duplicate or alternate pose</td>
</tr>
<tr>
<td>• Product image should depict the actual product to be purchased. Accessories that are not part of the product should not be shown.</td>
<td>• Stacks of products or images containing multiple products</td>
</tr>
<tr>
<td>• Main image must be of the front of the product and if on a model, the model should be standing</td>
<td>• Other products, items, or accessories that are not part of the product listing</td>
</tr>
<tr>
<td>• Main image must match the gender of the department listed for that product (i.e. female image for women’s products and male image for men’s products)</td>
<td>• Image place holders (such as, &quot;temporary image&quot; or &quot;no image available&quot;)</td>
</tr>
<tr>
<td>• Images must be appropriate for all ages</td>
<td>• Images containing graphs of product ratings</td>
</tr>
<tr>
<td>• Images uploaded must be at least 1,001px on the longest side to enable zoom functionality</td>
<td>• Promotional text such as &quot;sale&quot; or &quot;free ship&quot; (use the Manage Promotions tool instead)</td>
</tr>
<tr>
<td>• Image aspect ratio must be at least 190 pixels by 246 pixels</td>
<td>• Size charts, delivery zone maps, or any graphic not related to the product</td>
</tr>
</tbody>
</table>
Note:

- When submitting the main image for child products, be sure the image represents the actual child product being listed. For instance, if you are listing different colors of the same t-shirt it is important that you provide images that represent all variant colors.
- Zoom Functionality - When you submit an image of at least 1,001 pixels on the longest side, customers can zoom in on your product image. This provides a detailed look at your product and may reduce returns and negative feedback.
- SKUs missing a main image will have the offer suppressed from the site.
- The back or rotating image that displays when a customer hovers over a product on a Browse page is the first Alternate (PT01) image available on a child SKU.

Intimate Apparel, Lingerie, and Swimwear Image Content Guidelines

Images of intimate apparel, lingerie, and swimwear products may not be sexually explicit or obscene, as determined by Amazon. In addition, images of such products must comply with the following rules:

- Images of live models that use poses that could be interpreted as indecent, excessively erotic, or lewd are not permitted.
- Images that display full nudity (breasts, genitalia, bare bottoms, and so on) are not permitted. Images with live models wearing sheer products might be permitted, provided that genitalia and breasts/nipples are not exposed or presented in a lewd or provocative manner. No bars or other types of graphics are permitted to cover exposed body parts.
- Thongs and panties must use front views for the main product image. Back views can only be uploaded as alternate views.
- Thongs and panties that do not provide full coverage in the front and back must have flat product images that are not displayed on a model. Air-brushing is not permitted for exposed skin areas.
Variation Relationships

Variations allow customers to choose the desired color and size of your product from a single detail page, which you create using parent-child product relationships. Variations provide a cleaner customer buying experience.

The parent products are the initial display on the detail page. The child products are the products that are related to each parent and display when the variation is selected by the buyer. The relationship of parent to child is the variation theme: Size, Color, or Size-Color. For most products in the Clothing category, Size-Color is preferred. Exceptions are Costumes and Luggage, which are discussed further in those sections.

Components of Parent/Child Relationships

There are three components of a parent/child relationship: the parent product, the child products, and the variation theme.

Parent Product

The parent product illustrates what the child products have in common. Although the parent product must be part of your product data, you do not offer it for sale on Amazon.com. Instead, the Amazon.com catalog uses the parent product to establish relationships between other products. For example, if two shirts have the same parent (such as “Men’s Calvin Klein Dress Shirt”), they are related and are considered child products. The parent product title will be displayed in search results and should follow our format guidelines: **Parent Title**: [Brand] + [Department/(and Special Size, if applicable) + [Product Name]

Child Products

The child product is a particular product, such as a “Calvin Klein Men’s Dress Shirt Royal Blue Medium.” You can have many child products that are all related to one parent product. Each child varies in some way. In Clothing, Color and Size are key variations.

Child or Standalone Product **Title Format**: [Brand] + [Department/(and Special Size, if applicable) + [Product Name] + [size] + [color]

Variation Theme

Variation themes set the parent/child relationship by defining how related products differ from each other. For example, in the Clothing, Accessories & Luggage category, child products can differ from each other by size, color or both. Customers pick the size and color they want from the drop-down menus to select a particular shirt size and color. (Drop-down menus appear automatically when you use variation themes).
When to use Variation Relationships

All Clothing & Accessories categories support variation relationships. Amazon requires that you include your products in a parent/child relationship that establishes correct variation themes.

**Note:** Amazon can remove products that do not correctly establish variation themes.

<table>
<thead>
<tr>
<th>Use Single Variations (Size or Color)</th>
<th>• For single variation examples, see the Luggage and Costume category information in this document.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use Double Variations (Size and Color)</td>
<td>• This is the preferred configuration for Clothing products, even if a product currently comes in one color or size. For products that currently come in one color, list the same color name for each child SKU to allow for future additions of other colors. For products that are one size, use the value One Size in the size field for each child SKU.</td>
</tr>
<tr>
<td>No Variations</td>
<td>• The product exists in one configuration only and does not vary by size or color. Some accessories may fall into this group, but it is best to set up the product with a Size/Color variation theme if there might be other colors or sizes offered in the future.</td>
</tr>
</tbody>
</table>

**Single Variation**

![Link to LibbySue-Multi-Patterned Chevron Print Infinity Scarf](image)

**Double Variation**

![Link to Three Dots Women's Short Sleeve Twist Waist Twist Dress](image)
When creating variations, you must provide information in these required fields:

- SKU
- Parentage (identify for that SKU, either "parent" or "child")
- Parent SKU (for child SKUs only, enter the parent SKU for that child)
- Relationship Type (enter "variation" if the product is part of a variation set)
- Color
- Size
- Variation Theme (Size, Color, Size/Color)

**Note:** If you enter the Relationship Type and fail to enter the color or size, you might receive an error when uploading your data or your product might not display properly on the website. Make sure you have entered all required variation fields for your products. If you fail to enter any of the required fields, your products could be suppressed from display on the Amazon.com website. If you have questions, search for Creating Parent/Child Variation Relationships in Help.

### Required

- Fully describe each child product so that they will be included in browse and search results.
- Add the size and color to the child product title (For details, see Section II: Title Styles).
- Use SKUs to build relationships using field for SKU and Parent SKU.
- List the Child offers under the Parent SKU in the flat-file or XML.

### Prohibited

- Do not include price and quantity values for parent products.
- The parent title should not include size or color.
- Do not choose a variation theme ID other than size, color, size-color.
- Do not link any products that are not a variation of size or color to the parent product. Child listings must be the same style as the parent and cannot be materially different. For example, if the parent listing is a long-sleeve style, the child cannot be a short-sleeved style.
- Do not include multiple departments in a single variation. Items that come in Men’s and Women’s sizes should be split into separate variations.

**Note:**

- For Kids Clothing, Girls must be split into Little Girls (2-6x) and Big Girls (7-16) and Boys must be split into Little Boys (2-7) and Big Boys (8-20). See Setting up Variations for Kids and Baby below.
- For Costumes, unless the specific style is available in more than one color we recommend using the Size variation theme.
How to set up variations for a product

Using Feeds:
To properly set up your variation theme and product relationships, see “Creating Variations with a Flat File.”

Setting up Variations for Kids and Baby

ASIN families must have the same ITK and Department for all parent and child variations in order to be properly classified into the browse structure. A common mistake occurs when sellers set up a single ASIN family by combining a Baby-Girls ASIN with a Girls ASIN or vice versa for Boys, which causes products to be unclassified, making them undiscoverable and unsellable.

A best practice is to create separate ASIN families for Baby (0-24 months), Little Girls (2T-6x), Big Girls (7-16), Little Boys (2T-7) and Big Boys (8-20). We separate listings in Boys, Girls, and Baby according to size (see size charts below). This separation exists in order to present the best shopping experience for our customers as they navigate our massive selection. Customers shopping for Baby (0-24 Months) are very different from those shopping for little kids and toddlers (Little Girls sizes 2T-6x or Little Boys sizes 2T-7), and big kids (Big Girls sizes 7-16 or Big Boys sizes 8-20) in that the child wearing the clothing becomes more involved in the buying decision as they get older. For this reason, we have separate shopping experiences on-site for Baby, Little Girls, Big Girls, Little Boys, and Big Boys and in order to display your listings, they must be separated accordingly. Please see size charts and examples below:

Example #1: Baby
If you are selling a baby girls' clothing set (size 0-24 months), you should enter the following information in the feed:

- Department: baby-girls
- ITK (Item Type Keyword): infant-and-toddler-shorts-clothing-sets
- Title Structure: [Brand] Baby Girls’ [Product Name]
Example #2: Girls

If you are selling a girl’s clothing set (size 2T-16), you should create two separate listings, one for Little Girls (2T-6x), and one for Big Girls (7-16). Note that the Department is still girls for Little Girls’ and Big Girls’. Enter the following information in the feed:

**Little Girls (sizes 2T-6x)**
- Department: girls
- ITK (Item Type Keyword): shorts-clothing-sets
- Title Structure: [Brand] Little Girls’ [Product Name]

![Nautical Little Girls' Anchor Tank with Chambray Short Set](image)

Example #3: Boys

If you are selling a boys polo (size 2T-20), you should create two separate listings, one for Little Boys (2T-7), and one for Big Boys (8-20). Note that the Department is still boys for both Little Boys’ and Big Boys’. Enter the following information in the feed:

**Little Boys (sizes 2T-7)**
- Department: boys
- ITK (Item Type Keyword): polo-shirts
- Title Structure: [Brand] Little Boys’ [Product Name]
Big Boys (sizes 8-20)
- Department: boys
- ITK (Item Type Keyword): polo-shirts
- Title Structure: [Brand] Big Boys' [Product Name]

U.S. Polo Assn.
U.S. Polo Assn. Big Boys' Solid Short-Sleeve Pique Polo

List Price: $15.00

Size:
Select Size Sizing Info

Color: Black/yellow
- Cotton
- Machine Wash
- Number 3 twill patch on right sleeve
- Pearlized USPA buttons on placket
- Dress like a polo pro in this sporty offering from the U.S. Polo Assn.

Item Package Quantity

The Item Package Quantity (IPQ) provides customers with information on the number of units within an offer. Make sure you enter the correct IPQ in your listing data so your product will attach to the correct detail page.

**Note:** Most manufacturers create UPCs for products that are sold as a single unit or as a “set of” (for example, 2 bodysuits sold as 1 unit). However, some sellers bundle the single units to be sold as a set. To minimize detail page errors and customer confusion, it is important to always include the IPQ for products that could be sold either in a set or as single units.

<table>
<thead>
<tr>
<th>Your Product</th>
<th>Your Product IPQ</th>
<th>Why?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hanes Men’s 6 pack cushion crew socks</td>
<td>1</td>
<td>The customer will receive 1 package with 6 pairs of socks.</td>
</tr>
<tr>
<td>5 bags of Hanes Men's 6 pack cushion crew socks</td>
<td>5</td>
<td>The customer will receive 5 packages with 6 pairs of socks, a total of 30 pairs of socks.</td>
</tr>
</tbody>
</table>

**How to Set Up IPQ for a Product:**

**Add a Product in Seller Central**

**Text-file Feed Template**

XML

"Brand Y" boxers available as either a 4-pack or a single would be entered as:

- Set of 2 4-pack: (Title) = "Brand Y Men’s Boxers, Set of 2 (4-Pack)" >> (UPC) = "000123456789" >> (IPQ) = "2" >> (Price) = $40
- 4-pack: (Title) = "Brand Y Men’s Boxers, (4-Pack)" >> (UPC) = "000123456789" >> (IPQ) = "1" >> (Price) = $20
- Single: (Title) = "Brand Y Dress Socks" >> (UPC) = "000123456788" >> (IPQ) = "1" >> (Price) = $6
Browse & Search

Customers find your products by using the browse option or by using search terms. Make sure customers can find your products either way. Drive traffic by providing a well-constructed title, search and required Item Type Keyword (for browse).

Classification- Browse

Thousands of sellers sell millions of products on Amazon.com. To help customers find products easily, Amazon developed a detailed product hierarchy or browse-tree structure. Customers refine by category and subcategory links until they reach the most specific product type. Make your Item Type keywords more specific and watch your sales grow!

Amazon uses your Item Type Keywords to classify your products under the correct browse nodes. In order for your products to continue to appear when customers refine their category options, they must be classified correctly to the deepest level. This means that your polo shirts should be classified as polo-shirts and not just as shirts or clothing.

Example of the browse-tree category structure on Amazon.com:

**Department**
- Clothing & Accessories
  - Women
    - Tops & Tees
      - Knits & Tees
      - Blouses & Button-Down
    - Shirts
    - Tanks & Camis
    - Polos

How to Pick and Apply Terms to a Product

Download the latest version of the [Browse Tree Guide (BTG)](link). The Browse Tree Guide is updated periodically throughout the year and contains information on the Department Name and Item Type Keyword (ITK) mappings that are required to properly classify your product within the Amazon.com Clothing Store. The Item Classification Guides (ICGs) formerly used for setting up your product have been discontinued.

For example, to classify a women’s denim miniskirt, you would complete the following steps:

1. Refer to the latest Amazon Clothing BTG in Seller Central.
2. Filter for the item type on the Node Path column on the Apparel worksheet tab (in this case, “skirts”).
3. Filter for the department on the Query column on the Apparel worksheet tab (in this case, “women”).
Note:
- Item Type Keyword and Department must have the same exact spelling and formatting as listed in the BTG. **Typos and misspellings will prevent your product from being assigned to the correct Browse node.**
- Make sure all of your products have a single Item Type Keyword and a single Department name, as specified in the BTG. Use the most refined item type keyword and not a top level item type. Using of multiple Item Type Keywords or Departments will result in products being misclassified.
Kids and Baby Classification

Item Type Keywords for unisex are to be used only for Baby and NOT for Girls and Boys. Sellers should list only one department per ASIN. Listing ASIN under multiple departments will cause your ASIN to be misclassified.

The following are classification examples for Unisex-Baby, Baby-Girls’ and Girls:

- **Baby-Girls/Pajamas:**
  Department = baby-girls
  Item Type Keyword = infant-and-toddler-pajama-sets

  Note: You must use infant-and-toddler as the ITK for Baby Girls’/Baby Boys’, which includes sizes 0-24 Months. Toddler sizes (2T-5T) however should be included with Little Girls or Little Boys ASIN families, not Baby.

- **Little Girls/Pajamas:**
  Department = girls
  Item Type Keyword = pajama-sets

  Note: You must use Boy or Girl ITKs for Little Girls (sizes 2T-6x) and Little Boys (sizes 2T-7)
• **Big Girls/Pajamas:**
  Department = girls
  Item Type Keyword = pajamas-sets

  **Note:** You must use Boy or Girl ITKs for Big Girls (sizes 7-16) and Big Boys (sizes 8-20)

  ![Image of Big Girls/Pajamas](image1)

• **Unisex-baby:** Department=Unisex-baby and Item Type Keyword=infant-and-toddler-pajama-sets

  **Note:** As long as your entire ASIN family (parent and children) are assigned to department=unisex-baby your products will browse in the unisex node, the baby girls node, as well as the baby-boys node. Multiple departments cannot be used in an ASIN family. For example, If a blue color child variation is set up with department baby-boys and a pink color child variation is set up with department baby-girls these items would not surface in any of the right browse nodes as a result of the variation family containing both baby-boys and baby girls as a department. The whole family should be under unisex-baby, or separate ASIN families should be created for baby-girl and baby-boy.

  ![Image of Unisex-baby](image2)
### Classification- Special Size Type

Adding a Special Size Type for your listing is a great way to help customers find their right fit.

<table>
<thead>
<tr>
<th>Department</th>
<th>Special Size Type Valid Values</th>
<th>When To Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>womens</td>
<td>plus-size</td>
<td>For women’s plus size apparel. Use this value for sizes 18 and up and size XXX-Large or above. If the entire product line is plus size, enter for all sizes.</td>
</tr>
<tr>
<td>womens</td>
<td>petite</td>
<td>For women’s petite apparel, typically designed for women less than 5’4” tall, including short length pant/jean styles.</td>
</tr>
<tr>
<td>womens</td>
<td>petite-plus-size</td>
<td>For women’s petite plus apparel, including short length plus size pant/jean styles.</td>
</tr>
<tr>

<td>For men’s tall sizes and long inseams in sizes below XXX-Large</td>
</tr>
<tr>
<td>mens</td>
<td>big-tall</td>
<td>For men’s tall sizes and long inseams in sizes XXX-Large and larger</td>
</tr>
<tr>
<td>mens</td>
<td>short</td>
<td>For men’s short length pants</td>
</tr>
<tr>
<td>girls</td>
<td>plus-size</td>
<td>For girls’ plus size apparel</td>
</tr>
<tr>
<td>girls</td>
<td>slim</td>
<td>For girls’ slim fit apparel</td>
</tr>
<tr>
<td>boys</td>
<td>husky</td>
<td>For boys’ husky fit apparel</td>
</tr>
<tr>
<td>boys</td>
<td>slim</td>
<td>For boys’ slim fit apparel</td>
</tr>
</tbody>
</table>

**Note:**
- A value should not be entered for the Special Sizing field for Regular sizes.
- The Special Size Type is case sensitive.

To add one of the Special Size values listed in the chart above to your listing, the Special Size Type field can be found:

- Inventory (Flat) File: update to special-size-type
- Product Feed XML: SpecialSizeType
- Add a Product: Special Size Type
Search

Search terms help customers find your products. Your product titles and brand name are already searchable, so think about other words that describe your product. Think like Amazon customers when choosing your terms; use words they might enter into the search bar, including synonyms. Make sure they can find your products!

Guidelines for listing your Search Terms

- Each product can have up to five search lines of 50 characters per field (250 characters available for your search terms).
- The words you choose are the terms our search engine uses when customers search Amazon.com.
- The individual words of the title, seller, and brand are also automatically included as search terms and do not need to be repeated in your search terms.
- Any combination of title words and search terms are fully searchable.
- **DO NOT SPAM** search terms with other brands or inappropriate terms. Using brand terms that do not match the product being sold is against Amazon policy and may result in the removal of your selling privileges.

Examples

**Text–file feed**

<table>
<thead>
<tr>
<th>AJ</th>
<th>AK</th>
<th>AL</th>
<th>AM</th>
<th>AN</th>
</tr>
</thead>
<tbody>
<tr>
<td>SearchTerms1</td>
<td>SearchTerms2</td>
<td>SearchTerms3</td>
<td>SearchTerms4</td>
<td>SearchTerms5</td>
</tr>
</tbody>
</table>

If you are using an inventory text file, the template fields for search terms appear as search-terms1, search-terms2, and so on. For more details about how to create effective search terms, see [Using Search & Browse in seller Central Help](https://sellercentral.amazon.com/gp/help/customer/display.html?nodeId=SIGMD0QY2ASKNYOQ0B), Learn about [Classifying Your Products](https://sellercentral.amazon.com/gp/help/customer/display.html?nodeId=SIGMD0QY2ASKNYOQ0B) using XML.

<td>you don't need to repeat your title words</td>
</tr>
<tr>
<td>customers search these words to find your products</td>
<td>word space word space word space</td>
</tr>
<tr>
<td>Example: Dark Chocolate, Apples, Cookies</td>
<td></td>
</tr>
</tbody>
</table>
Costumes

While Costumes is mostly a seasonal business, customers are shopping for theme and holiday related costumes year round. Listed below are key attributes that are unique to the Costumes category. Learn more about best practices for Costumes in Seller Central Help.

Item data
Providing good item data affects many aspects of the customer shopping experience.

- Costumes should be set up using the Size variation theme.
- Use the dominant color of the costume in the color field for all Child SKUs (e.g. ‘red’ for Spider Man costume)
- The size attribute should only have the general sizing available for the brand. Gender or age terms, such as “Women’s” or “Youth”, should not be included. If a costume is available in both adult and kid sizes, you will need to set up different variation families for each size range.
- Costumes that are one size should have the size attribute value “One Size”.
- The product title should reflect the official title and not additional descriptive terms like “Sexy.”

Variations
All costume styles manufactured in more than one size should be set up in an ASIN family.

Unless the costume style is known to be manufactured in multiple colors for a single costume style, it’s Amazon.com best practice for Costumes to use the Size variation theme. This prevents a poor customer experience on the detail page when a costume displays “multiple color options” when the style is manufactured in a single color.

Note:
- Plus Size costumes often have a style number ID that is a modified version of the Regular sized costumes. In this instance, the Plus Size costume should have its own ASIN family.

**DETAIL PAGE EXAMPLES FOR CORRECT SIZE/COLOR VARIATION SET UP**

![Costume Example](image_url)
DETAIL PAGE EXAMPLES FOR INCORRECT SIZE/COLOR VARIATION SET UP

In this example, the same style has variations for color names “As Shown”, “Supergirl” and “Multicolored,” which may confuse the customer with the difference between the costumes.
Costumes Classification- Browse

The Theme and Character attributes are used to improve the browse structure and to improve search results. Listings with these attributes are also used by customers in the left navigation panel refinements.

Note:
- Theme – The Theme attribute is an open string where you can indicate the character of the costume, such as Batman, Sponge Bob, witch, vampire, nurse, etc. It is important that you use valid values to populate the Character field, as these will determine where the product will appear in the costume refinements in the costumes shop. A list of the main Costume Refinements and the appropriate valid values for the Character Field are provided in the table below:
- Subject Character - The subject character attribute groups costumes into general categories. There are over 200 options in the dropdown, but for costumes ONLY THE FOLLOWING MAY BE USED.

<table>
<thead>
<tr>
<th>Subject Character Field Valid Values</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>sports</td>
</tr>
<tr>
<td>steampunk</td>
</tr>
<tr>
<td>superhero</td>
</tr>
<tr>
<td>western</td>
</tr>
</tbody>
</table>

Costumes Classification- Departments

Costumes can be attributed to one of six departments: women’s, men’s, girls’, boys’, baby-girls’, or baby-boys’. For all other costumes and costume related accessories, one of the aforementioned departments should be selected based on the closest match to the product and/or the gender of the model.

Note:
- For tween costumes, select the department and related ITK for ‘girls’ or ‘boys’. For older teen costumes, select the department and related ITK for ‘women’ or ‘men’.
