

Determining Product Eligibility

Only items that match the exact version displayed in our Amazon Trade-in Stores are eligible for trade-in. If your product does not exactly match the versions in the Amazon Trade-In Stores, please try searching for it again. Items that do not match the items on the trade-in list will not be accepted. We're constantly updating the trade-in program with new titles. Please check back often to see what's been added.

Trade-In Condition

Specific conditions can be found displayed next to the item during the trade-in submission process. To view the condition description, hover over or click the trade-in product condition after you add the item to your submission.

Shipping and Payment

All items must be postmarked no later than 7 days after the trade-in submission. You will receive an email confirmation and an Amazon.com Gift Card will be deposited into your account within 2 business days of receipt and verification of your items.
