

Trouble shooting steps:

1. Add your Motion Sensor to the SmartThings hub and name it something you recognize
2. Open SmartThings Official Graph-API website:
<https://graph.api.smarthings.com/>
3. Login with your User and Password
4. Click on My Devices and Find and Click on the Motion Sensor (sort it by name and find based on the name you previously named it)
5. Once it opens, scroll to the bottom and click on Edit
6. Locate the “Type” Drop Down Menu and Look for “Z-Wave Plus Motion/Temp Sensor”
7. Click the Update button
8. Once you are done Refresh the Motion Sensor Device screen on the SmartThings App by backing out and returning to it.
9. You are now able to use the Motion Sensor to view motion or set up automations.
