---

**Key Issues: Social & Cultural** ..... 28

POPULATION. .... 28

- The U.S. Population Continues to Expand with Immigration
- Some Immigrants Driven to Leave U.S. and Seek Opportunities at Home
- Cities Are Getting Bigger

POTENTIAL IMPLICATIONS/RESPONSES: ..... 29

- More Communities of the Future Will Have Transit-Oriented Design
- Transforming Industrial Properties
- Movements to Spur Greater Use of Privately Owned Public Spaces
- Urban Waterfronts Will Be Redeveloped and Create New Communities, which Most Often Involve Environmental Remediation
- New Towns and Cities Are Being Built Near Oceans Internationally
- “Mega-Regions” Will Create Public Health Challenges

GENERATIONAL ..... 31

- Aging Population Creates New Needs
- Generation X Is Taking Over Management, Leading Older and Younger Generations
- Millennial Generation Distinguished By Use of Technology and Flexibility

POTENTIAL IMPLICATIONS/RESPONSES: ..... 33

- Needs of Generation Y Will Create Greater Push Toward Livable Communities
- Businesses Increasingly Shifting to a Four-Day Work Week
- Rising Rates of Obesity and Diabetes Will Impact the Workforce and Healthcare Costs
- Mood-Sensitive Architectural Design Will Become More Important to Help Deal with Public Mental Health and Other Public Health Related Issues
- Concerns Over Bioterrorist Attack or Global Pandemic Will Impact How Hospitals, Offices, Multi-Tenant Housing and Mass Transit Systems
- Are Designed and Built

**Key Issues: Environmental** ..... 38

GREEN BUILDING & THE ECONOMY... 38

- Stabilizing the Economy through Green
- Green Jobs Becoming Increasingly Important in Job Creation
- New Studies Demonstrate Financial Benefits of Green Building

# Table of Contents

---

- GREEN BUILDING MARKET ACTIVITY & OPPORTUNITY . . . . . 38
  - Nonresidential Green Marketplace Expected to Grow Despite Slower Economy
  - Education, currently the largest Non-Residential Green Building Sector, Will Continue to See Growth in Green Buildings
  - Healthcare Will Be a Major Growth Sector for Green
  - New Green Energy and Other Technologies Being Incorporated Into Healthcare Facilities
  - Financial Crisis Expected to Have a Greater Negative Impact on Green Office Market Penetration in the Short-Term; Long-Term Growth Is Strong
  - Green Retrofit Projects Will Gain Traction in 2009 and Become the Most Influenced Area for Green Building
  - 91% of Specifiers Will Be Specifying Green Building Products by 2013
  
- GREEN EXPANDING IN THE RESIDENTIAL MARKET . . . . . 44
  - Desirability of Green Homes Expected to Sustain Residential Marketplace in Down Economy
  - Green Retrofit Also Expanding in Housing
  - Homebuilders Trending Toward Green Building as Quality, while Home Owners Cite Cost Savings and Health Issues
  - Energy Performance Helps Drive Home Sales, But Not Enough to Allow Price Premiums for Good Performance
  - Energy Saving Green Products Most Popular in Residential Marketplace
  - Pacific, South Atlantic, and Mountain Regions Expected to See Greatest Growth in Sustainable Housing
  
- GREEN BUILDING PERFORMANCE. . . . . 47
  - Meet the Challenge! Public Declarations Are Becoming Commonplace
  - Climate Change the Major Benchmark for Measuring Green Buildings
  - Building Performance Studies Suggest Areas for Improvement
  - Environmental Monitoring Will Become More Prevalent
  
- GREEN PROJECT & PRODUCT CERTIFICATIONS & ASSESSMENT TOOLS. . . . . 49
  - Carbon Calculation Tools Will Likely Become Mainstays in Modeling
  - Focus on Carbon Causes Life Cycle Assessment to Continue to Gain Traction, Despite Lag in Overall Industry Adoption
  - Certification and Validation of Projects and Products Continues to Expand
  - Despite the Proliferation of Programs, Lack of Green Product Standard or Certification Will Lead to Greenwashing in the Short-Term and Unified Industry Activity in the Long-Term

# Table of Contents

---

- INCREASING INVOLVEMENT FROM CORPORATE AMERICA . . . . . 51
  - Corporate Commitment to Green is Long Term and Significant
  - Firms Are Shifting to Green for the Benefits of Being Perceived as a Sustainability Thought Leadership
  - Generation Y Will Shift U.S. Consumerism to Be More Socially Conscious
  
- POLICY & GOVERNMENT INFLUENCE . . . . . 53
  - State and Local Governments Have Biggest Impact on Adoption of Green Building
  - New EPA Guidelines for Water and Wetlands Will Bring Responsible Water Management to the Forefront of Green Building
  
- GLOBAL GREENBUILDING MARKET SHIFTS . . . . . 55
  - Europe Currently the Largest Global Green Market, but Asia is the Most Rapidly Growing
  
- RENEWABLE ENERGY . . . . . 56
  - Renewable Energy Use to Grow Dramatically Over the Next 5 Years
  - The Green Movement Brings New Interest to Nuclear Power
  
- MATERIALS & NATURAL RESOURCES . . . . . 57
  - Rising Costs and Scarcity Will Make the Link between Locally Grown Food and the Built Environment More Important
  - Innovative Materials Will Continue to Emerge Allowing Buildings to Be Greener
  
- EDUCATION & PROFESSIONAL INVOLVEMENT . . . . . 58
  - Sustainability Will Expand as Part of Professional Accreditation Making the Changes to the LEED Accredited Professional Designation More Relevant to the Architectural Community
  - Colleges Embracing Green Building
  
- Key Issues: Technological . . . . . 60**
  
- TOOLS AND ROI . . . . . 60
  - Building Information Modeling (BIM) Will Continue to Transform the Construction Industry
  - Contractor's Rapid Adoption of BIM in 2009 Will Generate ROI
  - By 2010, Owners Will Demand BIM
  - Government Will Eventually Require BIM Be Used for All Projects
  - BIM Software Vendors Will Have to Make Packages Interoperable for the User
  - Legal Issues May Slow Adoption of BIM for Some Users

# Table of Contents

---

- TEAMING FOR SUCCESS..... 62
  - Emergence of Integrated Team Business Models
  - Transformation of the Media Business Model
  
- FASTER, CHEAPER, BETTER..... 63
  - Dramatic Increases in Model-Driven Pre-Fabrication
  - Artificial Intelligence and Robotics
  - New Technologies Will Make Buildings More Efficient
  - New Building Materials Will Expand Options for Design
  - Photovoltaics May Be Less Expensive in the Future
  - Radio Frequency ID Tags Improve Logistics and Increase Productivity
  - Performance-Based Seismic Design Is Expected to Expand
  
- TELLING THE STORY..... 65
  - Dramatic Increase in Virtual Simulation of Building Performance Over Its Lifecycle
  - Millions of Completed Models Will Be Operating as “Digital Doubles” for Owners During Decades of O&M
  
- INCREASING INFLUENCE OF COMPUTER TECHNOLOGY ..... 66
  - Evolution of the Internet (Web 3.0 and Beyond)
  - Gaming and Virtual Reality
  - Ever Increasing Power of Computers & Networking
  
- Key Issues: Design & Construction Industries ..... 68**
  
- CONSTRUCTION INDUSTRY MARKET ACTIVITY FORECAST..... 68
  - The Construction Industry Will Not See a Recovery in Total Construction Until 2010
  - Struggling Consumers Will Cause a Dramatic 20% Slide in Construction Starts by Value in 2009 in the Retail Sector
  - Subleases are on the rise and new Office construction significantly depressed in 2009
  - Steep Drop in Hotel Starts Coming in 2009
  - Education Activity Lags the Market, so Strong 2008 Will Be Slowed in 2009
  - Healthcare Expects First Construction Market Downturn in Four Years, but Long Term Forecast is Strong
  - The Steep Decline in Multi-Family Housing Predicted to Worsen in the Short Term
  - BRAC Program Has Impact on U.S. Construction Markets
  - Regional & Local Construction Activity

# Table of Contents

---

- HOUSING MARKET . . . . . 73
  - New Policies Can Help Stimulate Housing Market
  - Assisted Living Market Stumbles
  - The End of the McMansion? Smaller Homes Now Preferred by Consumers
  - Home Remodeling Sees Shifts in the new Marketplace
  - Severity of Recent Hurricanes Inspires Changes to Building Design and Construction, Particularly in Housing Design
  
- MATERIAL & LABOR COSTS. . . . . 76
  - Union Contracts Suggest that Construction Labor Costs Will Increase in 2009
  - After Brief Spike, Construction Material Prices Fell in Most Sectors and Are Expected to Remain Low in 2009
  
- INFRASTRUCTURE & URBAN DEVELOPMENT . . . . . 77
  - Interest in Re-Urbanism and Density Continues to Grow
  - Infrastructure Needs Demand Creative Financing, Including Public Private Partnerships
  - Public Private Partnerships Continue to Grow Internationally
  
- ACTIVITY IN THE MIDDLE EAST . . . . . 79
  - Industry Experts Believe Work in the United Arab Emirates is Slowing though Far From Stopping; Expansion Expected in Lebanon and Bahrain
  - The Middle East Investing in Renewable Energy
  
- Key Issues: Architecture Profession . . . . . 80**
  
- SURVIVING THE CURRENT ECONOMIC CRISIS . . . . . 80
  - Architectural Firms and Individual Architects Strategize to Survive Devastating Economic Times
  - More Architects Are Expanding to International Markets & Getting New Clients
  
- WORKFORCE SHORTAGES ACROSS ENTIRE INDUSTRY . . . . . 81
  - The Availability of a Future Workforce Will Continue to Challenge the Industry Making Training and Education and Managing Labor Resources More Important
  - Restrictions on U.S. Immigration Will Continue to Hurt Architecture Firms
  - Shortages of Engineers Will Need to Be Relieved
  - Skilled Craft Worker Shortage Will Continue to Affect the Construction Industry
  - Building Incubators Are Trying to Nurture Fledgling Design Firms

# Table of Contents

---

DISTRIBUTED WORKFORCE EXPANDING . . . . . 83

- Outsourcing Architectural Services Will Increase
- Firms Will Also Need to Shift to Manage This More Distributed Workforce
- Transportation Challenges and Teleworking Trends Have Impact on Office Space and Corporate Relationships with Communities

GREEN PROFESSIONAL TRENDS: INTEGRATED PROJECT DELIVERY, INTERDISCIPLINARY DESIGN & SUSTAINABILITY . . . . . 84

- Interest in Integrated Project Delivery Is Growing
- Sustainability Gets More Emphasis in the Classroom, and Within Firms
- The Emergence of the Green Consultant

DIVERSITY LEADING TO SPECIALIZED NEEDS . . . . . 85

- Increased Diversity: Women, Minorities, Immigrants and “Temporary Resident” Architects
- “Part Time” Architects Will Increase, Creating a Need for Licensure of Older Practitioners
- Enhanced Professional Specialization (Hyperjobs) & Lifelong Learning Will Increase
- Architects Will Become Increasingly Involved in Pro Bono and Public Interest Work

TALENT RETENTION. . . . . 86

- Firms are Learning to Nurture Talent Among Their Existing Staff
- Money Remains the Best Way to Retain Talent, Particularly Among Top Performers
