"Store-and-go" faster with the 16GB Corsair Flash Voyager GT.

The new 16GB Flash Voyager GT uses specially-selected, hand-screened MLC NAND flash memory in a dual-channel configuration, combined with a high-speed controller IC to deliver read and write speeds significantly faster than most USB flash drives. Whether you're backing up data or transporting office files, pictures, music or even full length movies, you can "store-and-go" faster with the 16GB Corsair Flash Voyager GT.

The new 16GB Flash Voyager GT also utilizes Corsair's proprietary water- and shock-resistant, all-rubber casing so that users with busy and active lifestyles can be confident that their data is secure and protected from damage. Independent reviews of the Flash Voyager products have demonstrated their ruggedness, durability, and reliability. Flash Voyager drives have been laundered, baked, frozen, boiled, dropped, and even run over by a SUV! After all the punishment they receive the drives continue to work.

Features

- Fast – Specially selected Flash and high-speed controller
- Efficient - 16GB of storage fits most users needs
- Durable - Corsair Flash Voyager is water & shock-resistant
- Portable - Unplug and put it in your pocket!
- Compatible- Plug & Play and USB 1.1 backward compatible
