

Office Products

Our products are easy to be affected by damp, mildew and fire. They need to be stored separately. They are not allowed to be mixupsed with other chemicals or commodities with high water and oil content, such as salt, fertilizer, sugar and cement.

It is also not allowed to be stored together with deliquate items, otherwise it is easy to hygroscopic deterioration

Winter is too dry, summer is too wet and poor ventilation, light exposure, will affect the product performance and quality to varying degrees
