Safety Precautions

SAVE THESE INSTRUCTIONS / For Household Use Only

- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- Do not use extension cords or ungrounded (two prong) adapters.
- This appliance is intended to be used in households and similar applications such as: staff kitchen areas in shops, offices and other working environments; hotels, motels and other residential type environments; bed and breakfast type environments; catering and similar non-retail applications.
- Do not pull the power cord when pulling the power plug of the beverage cooler. Please firmly grasp the plug and pull it out from the socket directly.

WARNINGS RELATED TO ELECTRICITY
- Do not damage the power cord under any condition.
- Please use a dedicated three-hole power socket which is 15A or more and not shared with other electrical appliances.
- Please ensure that the grounding electrode of the power socket is equipped with a reliable grounding line.
- The beverage cooler uses AC power supply of 115V/60 Hz. If the voltage fluctuation exceeds the range of 115V +/− 10%, it can cause accidents or damage the cooler.
- In case of leaking gas, turn off the leaking valve and open your doors and windows. Do not unplug the cooler yourself, as it may cause a fire. Contact customer support.
- For your safety, don’t place electric devices on top of the cooler like microwaves or electric kettles, and don’t store your beverage cooler inside pantries.

WARNINGS RELATED TO USE
- Make sure there is ample ventilation space surrounding the beverage cooler.
- Be careful not to get fingers or dangling accessories caught in the cooler door.
- This cooler and its packaging are not intended to be played with or used by children. If a child is using the cooler, it must be with adult supervision to avoid injury.
- Keep the cooler out of moist, damp or humid environments and situations so as not to damage the electrical insulation.
- Do not use base, cooler door, etc. as pedal or support.
- Do not place heavy objects on top of the cooler to prevent accidental damage or injury.

WARNINGS RELATED TO PLACING ITEMS
- Do not put flammable, explosive, volatile and highly corrosive items in the cooler to prevent damages to the product or fire accidents.
- Do not place flammable items near the cooler to avoid fires.
- This product is for household refrigeration appliances, mainly used in the storage of beverage, not for other purposes, such as storage of blood, drugs and biological products.
- Do not cover or close ventilation and exhaust holes.
Safety Precautions

PLACEMENT

• Before using the cooler, remove all packaging materials including bottom cushions, foam pads, and tape inside the cooler, tear off the protective film on the door and the cooler body.
• Make sure the cooler is placed in a well-ventilated indoor place; on flat, sturdy ground (rotate left or right to adjust the wheel for levelling if unstable).
• The room for cooler should become larger with more refrigerant in cooler, with 8g refrigerant corresponding to 1m³ spaces. The content standards of refrigerant are labels in name board on backboard of cooler.
• Avoid putting the cooler in direct sunlight or too close to a heat source --keep a safe distance of at least 30cm between the cooler and a stove or furnace if it can’t be avoided. We also advise applying an insulation board in that case.
• Keep a circulation space of at least 4cm on both sides of the cooler to preserve power.
Energy Conservation

- The cooler should be placed in a room that is dry and ventilated. The cooler cannot be placed under direct sunlight or next to heat source (such as a radiator, stove, etc.), and a suitable insulation board must be applied if necessary.
- Try to shorten opening time of cooler’s door.
- Avoid putting warm beverages in the cooler.

PROPER USE OF BEVERAGE COOLER

INTRODUCTION TO THE BEVERAGE COOLER’S FUNCTIONS

Display Controls
When turning on for the first time, the display screen will be a full display for 3 seconds and the startup tone will ring.

Standby Mode
To activate standby mode, hold the standby button for 3 seconds. You will hear a beep and the display area will be cut off. To deactivate standby mode, press the button again. You will hear a beep and the standard display will show.

Lighting
Press the lighting button to turn the light on or off.

Temperature Setting
Press the increase temperature button to increase the temperature one degree at a time. Press the decrease temperature button to decrease the temperature one degree at a time.

Memory Function
If turned off, this cooler will remember any settings in place and will work according to those settings once it’s turned on again.

Fault Indicators
If any of these indicators are displayed it means the cooler has the following issues.

Maintenance

DISCONNECTING THE BEVERAGE COOLER
Unplug the power plug from the socket to disconnect the cooler

CLEANING YOUR BEVERAGE COOLER
Dusting behind the cooler and on the ground will improve the cooling effect and save energy. The interior of the cooler should be cleaned to avoid any odor. Follow the cleaning procedure below.

1. Unplug the cooler.
2. Wipe the door seal with warm water.
3. Use soap and warm water to clean the cooler.
4. Reconnect the cooler when the cooler is clean and dry.

**Note:** Do not use hard brushes, wire brushes, abrasives, organic solvents, boiling water, acid or alkaline items as this may damage the cooler surface and interior.

FREQUENTLY ASKED QUESTIONS
I'm hearing some sounds, what's up with that? Buzzing or any gurgling sound is normal as that can be a result of the unit working properly or refrigerating fluid flowing through the pipeline.

Troubleshooting

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>POSSIBLE CAUSES</th>
<th>SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cooler isn't cool</td>
<td>The door is being opened too often. The cooler is too full of bottles or cans.</td>
<td>Reduce the frequency of opening the door and give it 4-5 hours.</td>
</tr>
<tr>
<td>Cooler is not refrigerating</td>
<td>The power is out or the cooler isn't plugged in.</td>
<td>Check the power and that the cooler is plugged in.</td>
</tr>
<tr>
<td>LED light is off</td>
<td>The LED light is broken.</td>
<td>Contact customer support.</td>
</tr>
<tr>
<td>Condensation on the glass door</td>
<td>The temperature is set too low or too high.</td>
<td>Increase the temperature and use a rag to wipe away any drops of water.</td>
</tr>

hOme® offers a limited two-year warranty (“warranty period”) on all of our products purchased new and unused from hOme Technologies, LLC or an authorized reseller, with an original proof of purchase and where a defect has arisen, wholly or substantially, as a result of faulty manufacture, parts or workmanship during the warranty period. The warranty does not apply where damage is caused by other factors, including without limitation: (a) normal wear and tear; (b) abuse, mishandling, accident, or failure to follow operating instructions; (c) exposure to liquid or infiltration of foreign particles; (d) servicing or modifications of the product other than by hOme®; (e) commercial or non-household use.

The hOme® warranty covers all costs related to restoring the proven defective product through repair or replacement of any defective part and necessary labor so that it conforms to its original specifications. A replacement product may be provided instead of repairing a defective product. hOme®’s exclusive obligation under this warranty is limited to such repair or replacement.

A receipt indicating the purchase date is required for any claim, so please keep all receipts in a safe place. We recommend that you register your product on our website, homelabs.com/reg. Although greatly appreciated, the product registration is not required to activate any warranty and product registration does not eliminate the need for the original proof of purchase.

The warranty becomes void if attempts at repair are made by non-authorized third parties and/or if spare parts, other than those provided by hOme®, are used.

You may also arrange for service after the warranty expires at an additional cost.

These are our general terms for warranty service, but we always urge our customers to reach out to us with any issue, regardless of warranty terms. If you have an issue with a hOme® product, please contact us at 1-800-898-3002, and we will do our best to resolve it for you.

This warranty gives you specific legal rights, and you may have other legal rights which vary from state to state, country to country or province to province. The customer may assert any such rights at their sole discretion.
Manufacturing Info

This manual is to be used with all items with the model number

HME030065N

SKU# : HME030065N
PART#: HME030065MNL
RATING: 115 V, 60 Hz, 75 WATTS, AC ONLY

Warning

Keep all plastic bags away from children.

State of California Proposition 65 Warnings:

THIS PRODUCT COULD CONTAIN ONE OR MORE CHEMICALS WHICH ARE KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS, OR OTHER REPRODUCTIVE HARM.

Manufacturer, distributor, importer and seller are not liable for ANY damage caused by improper use, storage, care or failure to follow warnings associated with this product.
