

All HPI cars are supplied with a two year component and labour warranty against any failures that happen as a result of manufacturing or a design defect.

If you feel that you've experienced a premature failure of a part please contact either the shop that you have purchased your car from or our distributor in the country that the car was purchased from. If you need help identifying the distributor then you can find them on www.hpieurope.com

Once you've been in contact with your distributor they will be happy to let you know what they can do to help resolve your problem.

If you'd like further information on our warranty then you can obtain a copy of the warranty document supplied with all HPI cars by letting us know and we can get one emailed over or posted out for you!

To ask a question in the US, please contact support by email support@hpiracing.com or call our service center on (217) 398-0007.
