How do I use Finish® automatic dishwashing detergent products?

How do I use Finish® Quantum® capsules?

1. Place one pre-measured capsule in the main detergent cup and close.* It is important that both Quantum® and the detergent cup are dry.
2. The capsules are wrapper-free and are designed to release their contents when they come into contact with water. Do not pierce or attempt to unwrap the capsules.
3. Close the packaging lid tightly. Store away from heat and moisture to protect the remaining capsules.
4. Make sure all items are dishwasher safe and separate silver from stainless steel. Wash metal items according to manufacturer’s instructions.
5. Run dishwasher. The optimal water temperature is 125° – 140° F.
6. In hard water conditions, it may be necessary to continue to use Finish® Jet-Dry® rinse aid for optimal results.

**Do not use short wash cycle programs

How do I use Finish® All In 1 Finish® Powerball® Tabs?

1. Remove one tablet from its protective wrapper.
2. Place the unwrapped tablet in the main dishwasher detergent dispenser and close. Use one fully dissolving tablet per wash load.
3. Make sure all items are dishwasher safe and separate silver from stainless steel. Wash metal items according to manufacturer’s instructions.
4. Run dishwasher. The optimal water temperature is 125° – 140° F.

How do I use Finish® All In 1 Gelpacs®?

1. Please make sure your hands are dry before handling the GelPac® and do NOT cut open the GelPac®.
2. Place one GelPac® in the main dishwasher detergent dispenser and close. Each GelPac® is pre-measured so you need just one.
3. Run the dishwasher. Gel releases on contact with the water. The optimal water temperature is 140° F.

How do I use Finish® Powder and Gel?

1. Fill your dishwasher detergent dispenser completely. If you have heavily soiled dishes and/or hard water, use slightly more detergent. Use less detergent if you have very soft water.
2. Run your dishwasher. Optimal water temperature is 140° F.
