

Wi-Fi issue: The Wi-Fi can be optimized with Bebop. Users can access <http://blog.parrot.com/2014/11/28/parrot-bebop-drones-flight-range-test/> to see complete setup process

- **Video Transfer:** The Bebop Drone App (FreeFlight 3) will record the video in the memory of the Drone; in order to retrieve it while you're connected to the Drone, open the App, select "Internal Memory", select the video file, then transfer to the gallery of your smartphone or tablet.
- **Erratic Flight:** We recommend customers to **update your Bebop Drone** to the latest firmware version to enjoy the new improvements brought for Bebop.

Customers in need of technical assistance can contact Parrot Customer Service at 877- 9PARROT (972-7768) or <http://www.parrot.com/usa/support/hotline>

Parrot Bebop Drone

Latest available version : 1.98.10
FreeFlight 3: 3.3.4 (Apple) 3.3.6 (Android)

When you fly the Parrot Bebop Drone outdoors, remove the hull protectors, deactivate the "Hull" button, and activate the "Outdoor button" for better speed performance.
