1. Identification

Name Dibutyl succinate

CAS Number 141-03-7

Recommendation for the chemical and restrictions on use

Applications Research and development/Performance chemical/ Industrial

solvent.

Restricions No specific uses advised against are identified.

Supplier's Details

InKemia Green Chemicals, Inc.

1213 West Loop North Suite 140, Houston, TX 77005

+1 (713) 909-7717

web@inkemiagreenchemicals.com

Emergency contact number

InKemia Green Chemicals, Inc.

Tel: +1 (713) 909-7717 For emergency calls only.

2. Hazards

Classification of the substance or mixture

Classification Acute aquatic toxicity (Category 2), H401.

Label elements

Pictogram None Signal word

Hazard Statements H401 - Toxic to aquatic life.

Precautionary Statements P273 - Avoid release to the environment.

P501 - Dispose of contents/container to an approved waste disposal

plant.

3 - Composition/information on ingredients

<u>Substances</u>

Chemical Name Dibutyl succinate

Synonyms Succinic acid di-n-butyl ester; Dibutyl butanedioate; Di-n-butyl

succinate.

CAS Number 141-03-7

Molecular Formula C12H22O4

+1 (713)-909-7717

1213 West Loop North, Suite #140, Houston, TX 77055

Ver. 4.0 Rev. 27-10-2017

Print.

Molecular Weight (g/mol) 230.304

Hazardous components

Component	Classification	Concentration
Dibutyl succinate	Aquatic Acute 2; H401 .	<=100 wt.%

Note: For the full text of the H-Statements mentioned in this Section, see Section 16.

Impurities and stabilizing additives No data available.

Mixtures Not applicable.

4 - First-aid measures

Description of first aid measures

General information Get medical attention if any discomfort continues. Show this

Safety Data Sheet to the medical personnel.

Inhalation Remove from exposure, moving to fresh air. Artificial respiration

and oxygen are necessary if not breathing. Consult a physician.

Ingestion Wash out mouth with water if the person is conscious. Do not

induce vomiting. Consult a physician.

Skin contact Immediately wash skin with soap and copious amounts of water.

Eye contact Immediately irrigate with copious amounts of water for 15

minutes. Remove contact lenses, if present and easy to do.

Consult a physician.

Protection of first-aiders First aid personnel should wear appropriate protective equipment

during any rescue.

Most important symptoms and effects, both acute and delayed

General information The severity of the symptoms described might vary depending on

the concentration and length of exposure.

Inhalation No additional symptoms and effects are anticipated.

Ingestion May be slightly harmful if swallowed.

Skin contact No additional symptoms and effects are anticipated.

+1 (713)-909-7717

Ver. 4.0 Rev. 27-10-2017

Print.

Eye contact Maybe a slight irritant to eyes.

Indication of immediate medical attention and special treatment need

Notes for the doctor Treatment of exposure should be directed at the control of

symptoms and the clinical condition of the patient.

5 - Fire-fighting measure

Extinguishing media

Suitable extinguisher media Water fog/spray. Dry chemical. Carbon dioxide. Alcohol resistant

foam.

Unsuitable extinguisher media No data available.

Special hazards arising from the substance of mixture

Specific hazards Carbon oxides.

Hazardous combustion productsThermal decomposition or combustion may liberate carbon oxides

and other toxic gases or vapors.

Advice for firefighters

Protective actions during firefighting

Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Avoid discharge to the aquatic environment. Control runoff water by containing and keeping it out of sewers and watercourses. If the risk of water pollution occurs, notify appropriate authorities.

Special protective equipment for firefighting

Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots, and gloves provide a basic level of protection for chemical incidents.

6 - Accidental release measures

Personal precautions, protective equipment, and emergency procedures

Personal Precautions

Wear protective clothing as described in Section 8 of this safety data sheet. No action shall be taken without appropriate training or involving any personal risk. Do not touch or walk into the spilled material.

Environmental precautions

Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

Ver. 4.0 Rev. 27-10-2017

Print.

Methods and materials for containment and cleanup

Methods for cleaning

Contain and remove the spillage, soaking up the residue with non-flammable absorbent. Place in an adequate container for immediate disposal. Eliminate sources of ignition. For waste disposal see Section 13.

Reference to other sections

For personal protection see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For disposal see section 13.

7 - Handling and storage

Precautions for safe handling

Usage precautions

Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink, and animal feeding stuff. Keep container tightly sealed when not in use. Avoid discharge to the aquatic environment. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers. For precautions see Section 2. When the product is handled appropriately, hazardous effects are unlikely to occur. Handle in accordance with good industrial hygiene and safety practice.

Advice on general occupational hygiene

Promptly wash if in contact with skin. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse.

Conditions for safe storage, including any Incompatibilities

Storage precautions

Store away from incompatible materials (see Section 10). Keep only in the original container. Keep container tightly closed, in a cool, well-ventilated place. Keep containers upright. Protect containers from damage. Keep in a fresh and dry place, avoiding direct sunlight. Keep container tightly sealed, in a fireproof place.

Storage class

Miscellaneous hazardous material storage. Preferably in a well-ventilated solvent cabinet.

Specific end uses

The identified uses for this product are in Section 1.

8 - Exposure controls/personal protection

Ver. 4.0 Rev. 27-10-2017

Print.

Control parameters

Occupational exposure limits:

Contains no substances with occupational exposure limit values.

Protective equipment

Engineering control measures

Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations. Local exhaust ventilation may be necessary for some operations.

Eye/Face protection

Wear safety glasses with side-shields.

Hand protection

Avoid skin contact. Wear protective clothes and solvent resistant gloves (nitrile).

Other skin and body protection

Use engineering controls to reduce air contamination to permissible exposure level. Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapor contact.

Hygiene measures

Wash after use and before eating, smoking and using the toilet. Do not eat, drink or smoke when using this product.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with a multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Environmental exposure

Do not let product enter drains. Discharge into the environment must be avoided.

oils.

9 – Physical and chemical properties

Appearance Colorless liquid. **Water miscibility @** Immiscible.

Odor threshold No data available.

Solubility (other) Miscible with most organic

Melting -29 solvents including petroleum point/Freezing

point, °C

Boiling point, °C 274 Partition 3.234 coefficient, log Pow

Flash point 144 **@ 25 °C**

Evaporation rate No data available. Autoignition No data available.

temperature, °C

Upper / lower No data available.

Decomposition No data available.

flammability or/and explosive limits

Vapor pressure @ 0.001 @ 25 °C (EPI Suite **Dynamic viscosity @** No data available.

25 °C, cP estimation).

Vapor density No data available. Explosive properties Not classified.

(air=1) Oxidizing properties No data available.

Relative density @ 0.977 Flammability Non-flammable liquid.

25 °C, g/cm³ Surface tension @ 32.8 20 °C, mN/m

10 - Stability and reactivity

Reactivity No data available.

Chemical stability Stable under normal storage conditions.

Possibility of hazardous reactionsHazardous polymerization do not occur under normal conditions.

Incompatible materials Strong oxidizing agents. Strong bases. Strong acids.

Conditions to avoid Heat and ignition sources.

Hazardous decomposition products Carbon oxides.

11 - Toxicological information

Acute toxicity - oral

Acute toxicity - oral (LD50,mg/kg) >8,000

Species Rat

Notes (oral LD50)Based on available data the classification criteria are not met.

Ver. 4.0 Rev. 27-10-2017

Print.

Acute toxicity - dermal

Acute toxicity – dermal (LD50,mg/kg) No data available.

Notes (Dermal LD50)Based on available data the classification criteria are not met.

Acute toxicity - inhalation

Acute toxicity - inhalation (LC50, dust/mist

mg/l)

Notes (Inhalation LD50)Based on available data the classification criteria are not met.

No data available.

Skin corrosion/irritation

ResultBased on available data the classification criteria are not met.

Serious eye damage/irritation

ResultBased on available data the classification criteria are not met.

Respiratory sensitization

Result Based on available data the classification criteria are not met.

Skin sensitization

Result Based on available data the classification criteria are not met.

Germ cell mutagenicity

Genotoxicity – in vitroBased on available data the classification criteria are not met.

Genotoxicity - in vivoBased on available data the classification criteria are not met.

Carcinogenicity

IARC No component of this product present at levels greater than or equal

to 0.1% is identified as human carcinogen by IARC.

ACGIH No component of this product present at levels greater than or equal

to 0.1% is identified as a carcinogen or potential carcinogen by

ACGIH.

NTP No component of this product present at levels greater than or equal

to 0.1% is identified as a known or anticipated carcinogen by NTP.

OSHANo component of this product present at levels greater than or equal

to 0.1% is identified as a carcinogen or potential carcinogen by

OSHA.

Reproductive toxicity

Fertility Based on available data the classification criteria are not met.

DevelopmentBased on available data the classification criteria are not met.

Specific target organ toxicity

STOT-single exposure No data available.

STOT-repeated exposure No data available.

Additional information

General information This product is not classified as hazardous.

InhalationNo data available.IngestionNo data available.

Skin contact Not irritating to skin.

Eye contact May cause slight eye irritation.

Route of entry Ingestion, Inhalation, skin and/or eye contact.

Target organs Not specific target organ known.

12 - Ecological information

Toxicity

EcotoxicityToxic to aquatic life. Large or frequent spills may have dangerous effects on

the environment.

Acute toxicity

Toxicity to fish LC50 (96h.) = 4.46 mg/l (Fathead minnow)

Aquatic invertebrates No data available.

Aquatic plants No data available.

Persistency and biodegradability

Persistency and biodegradability

No data available.

Result: - This product is readily biodegradable.

Biodegradation Readily biodegradable (EPI Suite estimation).

Potential for persistance maybe moderate.

Biological oxygen demand(mg/g)No data available.

Chemical oxygen demand(mg/g) No data available.

BOD/COD ratioNo data available.

Bioaccumulative potentialThis product is unlikely to bioaccumulate in the environment (BCF<500,

logPow=3.2).

Ver. 4.0 Rev. 27-10-2017

Print.

Mobility in soil Is not likely mobile in the environment due its low water solubility.

Results of PBT and vPvBNo data available.

Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional

handling or disposal. Toxic to aquatic life.

13 - Disposal considerations

Waste treatment methods

General information

The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of safely according to local regulations. When handling waste, the safety precautions applying to the handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues.

Disposal methods

Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents. Incineration and landfill should only be considered when recycling is not feasible.

14 - Transport information

DOT (US) Not classified as hazardous goods.

IMDG Not classified as hazardous goods.

IATA Not classified as hazardous goods.

Transport in bulk according toAnnex II of MARPOL 73/78, and the IBC Code:

Not applicable.

15 - Regulatory information

US Federal Regulations and state regulations

Components of the product are listed in the quoted regulations. For details, please refer to the regulations directly. This list is not exhaustive; please check for other applicable regulations.

This product has been classified by hazard criteria of the Controlled Products Regulations, and the SDS contains all the information required by the Controlled Products Regulations.

US Federal Regulations

SARA 302 Section 302 (Specific toxic chemical listings)

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

Ver. 4.0 Rev. 27-10-2017

Print.

SARA Section 311/312 (Specific toxic chemical listings)

No SARA hazards.

SARA Section 313 (Specific toxic chemical listings)

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

RCRA (hazardous waste code)

None of the ingredients are listed.

TSCA (Toxic Substances Control Act)

CAS: 141-03-7 is listed on the TSCA inventory.

CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act)

None of the ingredients are listed.

US State Regulations

Proposition 65 (California)

Chemicals are known to cause cancer

None of the chemicals in this product are listed.

Chemicals are known to cause reproductive toxicity for females

None of the chemicals in this product are listed.

Chemicals are known to cause reproductive toxicity for males

None of the chemicals in this product are listed.

Massachusetts Right to Know Components

No components are subject to the Massachusetts Right to Know Act.

Pennsylvania Right to Know Components

No components are subject to the Pennsylvania Right to Know Act.

New Jersey Right to Know Components

No components are subject to the New Jersey Right to Know Act.

Canada

This product is not distributed to Canada.
