1x Car charger

1x USB cable

2x 3.7V Rechargeable 18650 Batteries

If any accessories lost, please contact with us by annanzeke@126.com and we will send it to you at once.

Install and Charge batteries

- 1) Put the 18650 batteries into the battery cover according to the “+”“-” rightly.
- 2) You can use wall charger, car charger, USB cable to charge the battery.
It's better to charge for 5-6 hours initially. Then 2-5 hours after depending on battery depletion.
- 3) There is indicator red light on wall charger shows that it's being normally charged. When it turns into green, it means it is fully charged. Do not overcharge it.

Operation and Change light mode

- 1) To turn it on, press the button with click.
- 2) To change its light mode, also press the button with click.
- 3) There are 4 light modes which includes normal brightness(1 LED light up), middle brightness(2 small LEDs light up), high brightness(3 LEDs light up), SOS(strobe light,3 LEDs blinks) and red light behind as safety light for warning runners, bikes or cars.
- 4) Adjust the 2 loop buckles to make the comfortable wear.
The maximum circumference of the headband is up to 21.6in/55cm, and the minimum is about 13.7in/35cm.
- 5) The head of the lamp is 90° adjustable for oriented lighting. It will stay steady after positioning.

Warning:

- 1).Attention the **anode '+'** and **cathode '-'** of the battery when putting it into the battery cover.
- 2).Do not irradiate the eyes directly, as the brightness light will harm the eyes.
- 3).When the light fails in, please use new powerful battery to replace the old ones.
- 4).Please take out the battery when the light will be not use for some time.
