SPECIFICATION SHEET:

- **Mfr Part Number:** BL067
- **Features:**
 - Virtually inaudible operation at max. 15.5dB(A)
 - 6-pole fan motor with three phases giving very low power consumption and less vibration
 - Advanced fluid-dynamic bearing (FDB) enables a super long fan life of up to 300,000 hours
 - Seven fan blades with optimized surface structures ensure excellent airflow
 - The rubberized fan frame is equipped with funnel-shaped air inlets producing extremely high air pressure
 - Removable anti-vibration mountings minimize the transmission of vibrations to the PC case and its components
 - Advanced high quality IC motor controller reduces electrical noise
 - Pulse width modulation (PWM) allows compatible 4-pin controllers (including those built into many motherboards) to intelligently vary the speed of the fan
 - With PWM your system can ramp up the cooling when it's needed, or operate in maximum quiet mode when it's not
