# GLOW IN THE DARK POWER BALLS

## Kit includes:

- 1 Round Mold
- 1 Hexagon Mold
- 16 Bags of Crystals
- 2 bags of Glow-in-the-dark crystals

## Item needed:

- 1 Cup
- Scrap Paper
- Water
- Resealable bag

### Step 1: Set Up Your Work Area!

Find a flat surface that you can use as your work area. Cover your work area with scrap paper, newspaper, or paper towels. Lay out all your materials in front of you before you begin. Keep the box nearby so you can look at the pictures for ideas and inspiration.

### Step 2: Start Creating!

- Decide which shape mold and colors you are going to use to make your Power Balls.
- Snap together the two parts of the plastic mold
- Pour the crystals into the funnel on the top of the ball mold.
- Add some of the glow-in-the-dark crystals to each ball to see them glow! Do not fill the funnel part of the mold all the way to the top or your ball will not bounce well.
- Holding the funnel part of the mold carefully place the filled mold in a cup. While holding the mold fill the cup with warm water until the water is above the top of the ball mold. Let the mold sit in the water for 10 minutes.
- Remove the mold from the water and let it set on the protected surfaces for 10 minutes.
- Carefully open the mold and remove the ball. When you remove the ball from the mold, it may feel a little tacky. Let it dry until it is no longer tacky before you start playing with it.

### Step 3: Start Playing!

Congratulations! You have just created your own Power Balls! Go out and play with them or give them as a gift to your friends!

Find a clean, flat surface to bounce the balls on. Store Power Balls in a resealable bag.

**WARNING:**  
CHOKING HAZARD - Toy contains  
a small ball. Not for children under 3 years.
