

One Night Ultimate Werewolf FAQ

I'm always a werewolf, and I always lose. How do I win?

We suggest that you lie occasionally. Or even better, all the time. Not just in the game, but in real life. To practice, the next time someone asks "How are you?" make up a ridiculous story like "Not so well. After falling into a vat of peanut butter, I was attacked by a troop of ravenous baboons. Their leader had a strong French accent, and he told me that I smelled like strawberries before kicking me out of his truck in the middle of the frozen tundra." But say it with a straight face. You will then proceed to kick butt at One Night games.

Why doesn't the app work on my [insert name of 1990's cell phone here]?

The app works on a ridiculous number of iOS and Android devices, and Mac and Windows computers. You can even run it right off of the Interwebs from pretty much any device, if that's your thing (see a whole bunch of links above). If you still can't run the app, technology is not your friend, but one of your actual friends probably has a device that can run it. Also, please be sure to press the "Play" button in case that's where you're stuck.
