How to set up repeater mode:

1. Plug the repeater into socket near your router. Wait for a while to establish a signal until you see the last one light is always on.

2. Please connect to the open WiFi "wodgreat-xxxx" on your phone WiFi list. (Not your home existing WiFi, no need passwords).

3. Open your browser and type the IP address 192.168.188.1 in the address bar, not search, not add www, click "GO".

4. Type in default password "admin", click "LOGIN".

5. Click "SCAN", choose your home existing WiFi name, type in your WiFi existing WiFi passwords.

6. (optional, you can pass this step) You can change your SSID to anything what you like or not. If you think it's no need to change, then there is a new WiFi signal with default name "wodgreat-xxxx". If you want to change, then there is a new WiFi signal named what you changed.

Or you can select "Sync With Remote Network", then this WiFi repeater will combine to your home WiFi and use the same SSID.

7. Click "SAVE & APPLY", wait a few seconds and done. Reconnect to the new WiFi and get access into the internet.

Setup Video: https://youtu.be/6OFyxcGckaQ

Check it out Step by Step:

1. Please check you have plugged the device into power and lights are on
-- That means the device is working;
2. Please search the WiFi signal "wodgreat-xxxx"on your phone/laptop and connect it.
-- You need to connect the WiFi first. If you cannot find the WiFi signal, please unplug and plug it to search again. If still no signal, please reset the device (plug it in socket, use a small metal needle to press the reset button over 10s and release it. Then please re-search the "wodgreat-xxxx" and connect it without passwords. That means you reset the device successfully. - WiFi Repeater becomes an open WiFi)
3. After you connected the WiFi signal, please open your browser and enter the IP address 192.168.188.1 in the URL bar not search bar.
-- Please kindly make sure the IP address is correct. Please don't add www.in front of the IP address; Pls don't search, just input the IP address then click on "GO".
4. Fill out password "admin", click "LOGIN".
5. Click "SCAN", select your existing home WiFi name, type in your home WiFi passwords.
- Please note the password must be same as your home WiFi which you just selected. If the password is wrong, there will be no internet.
6. (optional, you can pass this step)You can change your SSID to anything what you

like. If you think it's no need to change, then it will use the default name "wodgreat-xxxx".
Or you can select "Sync With Remote Network", then this WiFi repeater will combine to your home WiFi and use the same SSID.
8. Click "SAVE & APPLY", wait for a few seconds.
-- After waiting for a few seconds, you can close the web page and go to WLAN setting to connect to the new WiFi. If you want to connect it with your computer via Ethernet cable, please plug the cable into LAN port.

Kindly Note:

1.Please connect your computer with "wodgreat-xxxx" on your wireless list before you login the website "192.168.188.1" to configure.
2. If you set it as a repeater, please enter your original home WiFi password.
3. Please note when you type in the IP address, do not Search. Just click on "GO" when you finished typing 192.168.188.1
