

Consevisen Silicone Brush

Introduction:

The food grade silicone brushes are BPA free and FDA approved. It is healthy for basting & pasting different oils, sauces, marinade, egg wash on your grilling items, veggies or meat, greasing cake and cookie pans, etc...

Dimensions:

The larger brush: 10.2" (L)*1.8"(W)

The smaller brushes: 8.2"(L)*1.3"(W)

Product Features:

Hold More & Spread Evenly - All brushes are able to hold good amount of liquids. The larger one has wide brush head with softer bristles, which is suitable for covering large area with fewer stops to re-dip. The smaller ones have little brush head with harder bristles, which is suitable for holding those liquids with small bits like spices, such as basil-rosemary egg wash on pizza crusts and calzones. Unlike the huge old fiber bristles brushes, the silicone brushes are very thin, great for delicate brushing. You won't miss any corner.

Heat Resistant- All the brushes are heat-resistant, up to 446°F /230°C. So it won't be melted when spreading on the hot grill. We suggest you to use the larger one to spreading hot BBQ food in the grill. Just by hold its long handle end, to get your hand far away from the grill heat, so your hands won't be burned.

Easy Maintain- The brushes can be washed by hand and is also dishwasher safe. Put a couple of drops of dish washing liquid in the palm of your hand and squish the brush back and forth on both sides getting a good lather, then give it a good rinse. Certainly, you could stick it in the dishwasher afterwards so it comes out perfectly clean again.

Warm tips:

- *Please wash it before the first time use. Clean and dry product after used.
- *Do not reach the silicon brush near to the fire.
- *Please keep the product out reach of the children. The silicone part may be broken by chewing and swallowed.
- *Do not contact the brushes with sharp item directly, or it may be cut through.
- *Please melt butter into liquid before brushing it onto food.
- *Keep the product under cool and dry place when not used.
- *To keep table clean, we suggest you to put a dish plate on the table for brush placing. When you are not using it, you could put brushes on it to avoid unwanted drips everywhere.
