1/2" Male Coupler (3)

Product Care & Storage

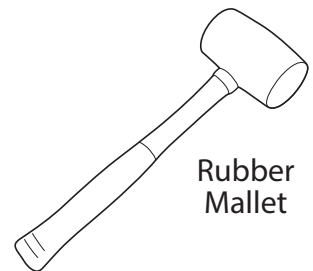

NOTE: The parts of the frame are made of PVC pipe and PVC glue may be used to secure all connections.

Your new poolside game has been made with many non-corrosive quality materials and should provide you with many years of enjoyment with proper care. However, sun and chemically treated pool water (chlorine) are natural enemies of many synthetic materials. For maximum life of your game, please do the following:

1. Do not leave the game ball floating around the pool when not in use.
2. After use, wash away the chlorine pool water with plain water using a garden hose.
3. When not in use, store your game in a dry place away from direct sunlight.

Recommended Tools

Phillips Screwdriver

Rubber Mallet

Step 1

- Lay out all the materials from the box in a neat fashion to organize the poles by labeled size.
- Note: The use of a rubber mallet may be necessary to push the PVC Pipe all the way into the Couplings and Tee Connectors. This will ensure proper fit of the volleyball net on the frame. Failure to push the PVC pipe all the way onto the Male Couplers and tee connectors may result in the net either being too tight or not fitting on the frame.

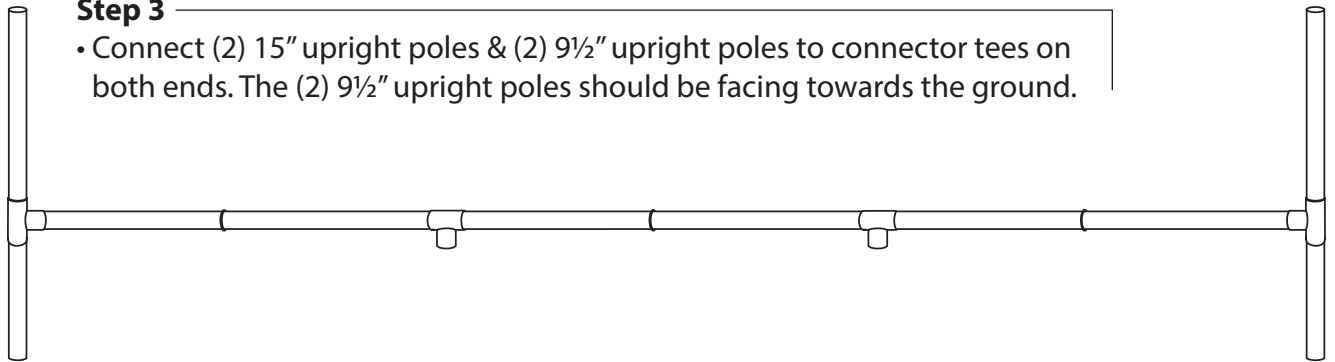

Step 2

- On a flat surface, begin the framing of the volleyball game. Connect (6) 14" horizontal poles with (4) tee connectors and (3) 1/2" Male Couplers.

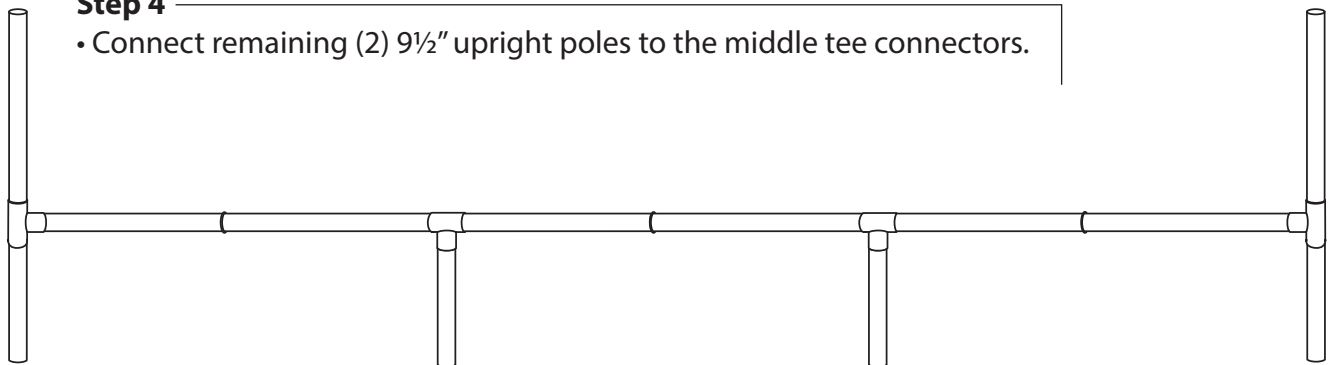

Step 3

- Connect (2) 15" upright poles & (2) 9 1/2" upright poles to connector tees on both ends. The (2) 9 1/2" upright poles should be facing towards the ground.

Step 4

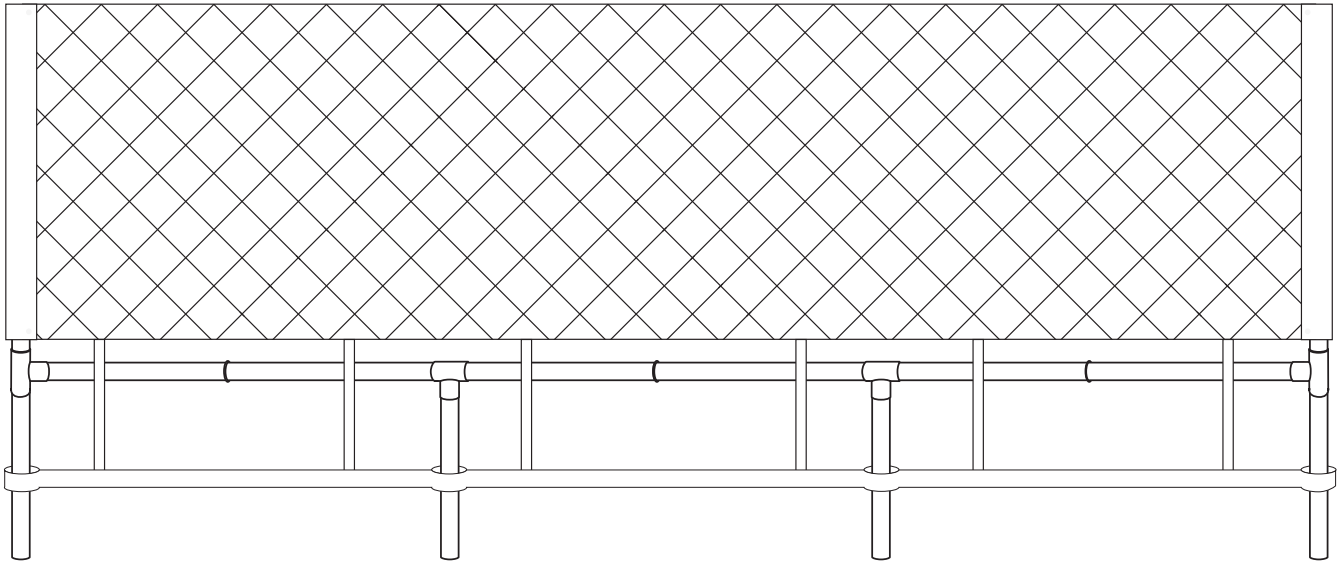

- Connect remaining (2) 9 1/2" upright poles to the middle tee connectors.

Step 5

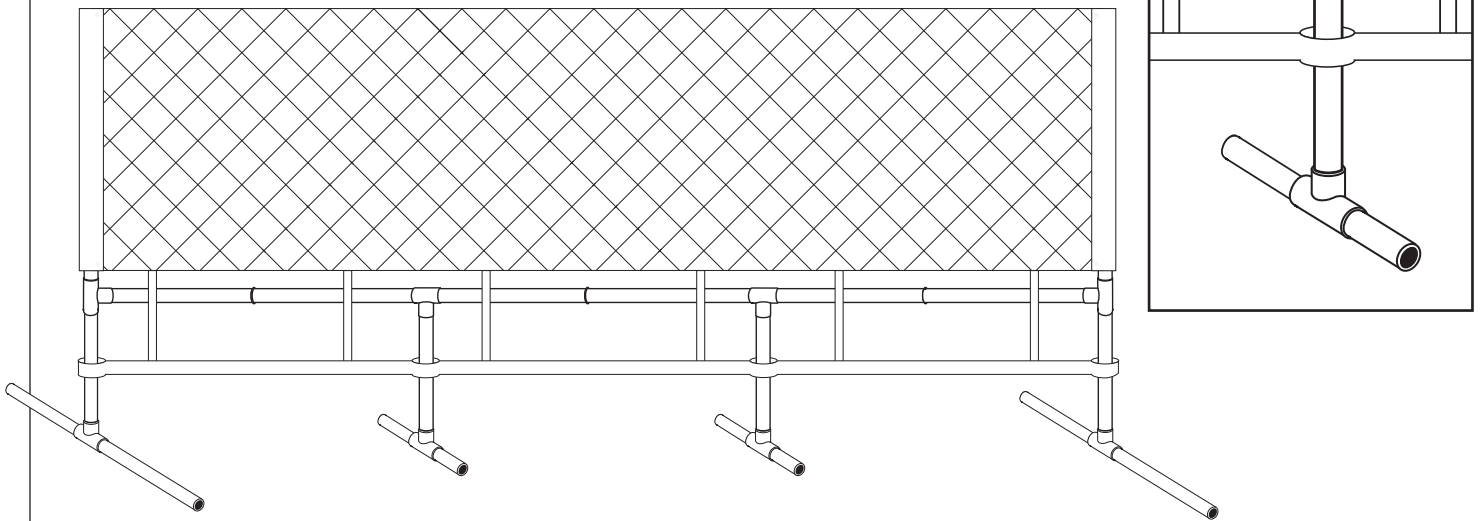

Attach Net.

- Lay net over the top of the PVC frame
- Slide the outside sleeve pockets onto each of the (2) 15" Upright Poles
- Slide the (4) small loops located at the bottom of the net onto the (4) 9½" Upright Poles

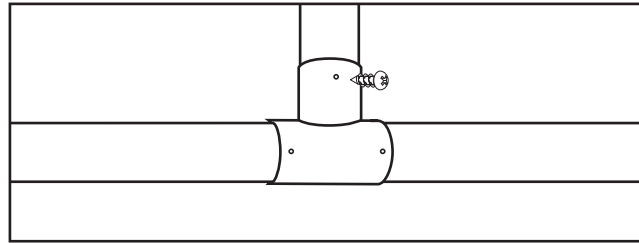

Step 6

- Insert the center of the (4) tee connectors onto each of the (4) leg poles
- Connect (2) 15" PVC poles to each of the outside tee connector openings
- Connect (2) 4" PVC poles to each of the inside tee connector openings

Step 7

- Secure frame with Set Screws.

Step 8

- Attach the 8" Foam Floats to 15" Base Poles. Attach the 3" Foam Floats to the 4" inside Base Poles.
