

## Humidity / Temperature Pen – Model 44550

### Features

---

- Measures Relative Humidity from 20 to 90%
- Measures Temperature from 14 to 122°F (-10 to 50°C) with switchable °C/°F units
- Built-in Resistive sensor for Relative Humidity measurements
- Built-in Thermistor sensor for Temperature measurements
- Max/Min record and recall of high and low temperature and humidity measurements
- CLEAR function key erases recorded readings
- Digital Display with 1% Relative Humidity and 0.1° Temperature resolution
- Complete with pocket clip and one (1) LR-44 button battery

### Instructions

---

- **ON/OFF Key**  
Press the ON/OFF key to turn the Pen On or Off.
- **C/F Key**  
Press the C/F Key to select the temperature units.
- **MAX/MIN Key**  
Press the MAX/MIN key once to view the highest temperature and relative humidity readings. An up arrow ▲ will appear on the left side of the display to indicate that the MAX mode is active.  
Press the MAX/MIN key a second time to view the lowest temperature and humidity readings. A down arrow ▼ will appear on the left side of the display to indicate that the unit is in the MIN mode.  
Press the MAX/MIN key a third time to exit the MAX/MIN mode and return to normal operation.

- **CLEAR Key**  
With the down or the up arrow visible on the display (indicating that the Pen is in the MAX/MIN mode), press the CLEAR key to erase the stored MAX/MIN temperature and relative humidity readings. When the readings have been erased the display will indicate all dashes ( - - - - ). New MAX/MIN readings will start recording within 3 seconds of the Clear function.->

### Battery Replacement

---

1. Using a coin or a screwdriver, open the circular battery compartment on the rear of the pen by turning it in the direction of the OPEN arrow.
  2. Replace the LR-44 battery and dispose of the used battery responsibly.
  3. Close the battery compartment by turn the compartment cover in the direction of the CLOSE arrow.
