Calligraphy Pen Set

Please read this important information before using the set...

The nibs are removable on both pens, but the fit on some of the glass and wooden pens is tight - the wood used for the pens is new and fresh when the nib holder is inserted. With time the moisture in the wood dries out and the wood contracts on the nib making it difficult to remove. Unfortunately this cannot be avoided. But it is possible to remove the nibs from both the glass and wooden pens after the first removal, nib removal becomes much easier.

Nib Removal:

The nib has a tip and at its opposite end is the shank. The shank is straight and has a curved profile - the shank end is used to attach the nib to the holder. To remove a nib from the pen, grip the nib near the shank between your thumb and forefinger. Pull the nib out firmly and smoothly. (You may need to twist slightly to free it).

Note: Avoid holding the tip of the nib as it can be easily damaged by too much pressure or twisting.

Nib Insertion:

Hold the nib firmly halfway down the nib body, avoiding gripping the slit and tip of the nib. Push the tab end into the spring-holder in the pen, keeping the curve of the shank lined up with the inside curve of the circular hole leading into the hollow handle. Make sure the nib is firmly inserted and gripped, it should never be loose. Once it's secure, the nib holder is ready to use.

Ink Guidance:

The pen sets are air freighted into the US and this may result in some particle separation in the inks. Please shake the bottles well before opening or use to ensure that the suspension is re-mixed before use of the ink. The inks are sealed with a plastic stopper which can be leveraged out of the bottle and re-inserted for safe carrying. Be careful when opening the stoppers for the first time as the pressure build up may cause the ink to spurt.

We hope you love your set and find it a joy to use. We would love to see your creations - email us your 'selfies' of our product with your creation!

If there are any issues, please reply to this email so we can help.
