FAQ

ARE LUBES SAFE TO USE WITH CONDOMS?

Most Durex lubricants & Durex Pleasure Gels are compatible with condoms. Please remember to always read instructions for further clarification.

CAN YOU USE LUBES WITH A MASSAGER?

Many people find using lube with a massager a real revelation. It lets the massager glide over the body - easily giving a more intense feeling. Water based Durex lubes are perfectly suited to use with all types of massagers and wash off easily with water.

HOW DO I APPLY LUBRICANT AND HOW MUCH DO I NEED?

There are really no rules here. The best thing to do is just relax, enjoy and experiment. If trying it for the first time, simply squeeze a little lubricant onto your fingertips and gently apply to your intimate areas. Lubricant can be used with or without a condom. You can always apply more if you need it.

IF A WOMAN DOESN'T PRODUCE THE RIGHT AMOUNT OF LUBRICATION DOES IT MEAN THAT SHE'S NOT TURNED ON?

No. There are lots of reasons why a woman might experience dryness including stress, after having a baby, using tampons, and changes in hormone levels.

WHY SHOULD I USE LUBES?

For too long lubes have been associated with gay men or women with vaginal dryness. But, there's a growing trend for people to use lube simply to make sex better. Lubes can be used to enhance sensations, add a bit of fun or just top up natural levels of lubrication. Durex Play lubes have been specially designed to make sure you enjoy the best sexperience!

WHERE ON THE BODY CAN LUBES BE USED?

Everywhere and anywhere. Most Durex Play lubes are suitable to for use all over the body! However a tingling lubricant is not suitable for anal sex as some people can experience slightly stronger sensations than others.
