

## SPECIFICATIONS

- Voltage  
120V ~60Hz
- Power Input  
4 Amps
- No-Load Speed  
3,500 rpm
- Max Cutting Depth  
1-1/16"
- Machine Weight  
4 lbs

The VersaCut is a 4 Amp electric tool and has a 10-foot cord to give you the reach you need to skip the extension cord.

### • WHAT SIZE BLADES FIT ON THE ROCKWELL VERSACUT?

The blades are 3-3/8" with an arbor of 19/32".

### • HOW LONG DO THE BLADES LAST?

The life span of the blades can vary depending on the type of blade and the materials being cut. Here are some guidelines based on typical use:

#### Carbide Tooth Blade:

- Cut 600m (1,968.8 ft) of 20mm (3/4") larch/pine
- Cut 600m (1,968.5 ft) of 15mm (5/8") plywood

#### HSS Blade:

- Cut 150m (492 ft) of 15mm (5/8") plywood
- Cut 5m (16.4 ft) of 2mm (.07874") aluminum

#### Diamond Blade:

- Cut 100m (328 ft) of 6mm (1/4") ceramic wall tile

### HOW DO I GET THE BLADE OFF?

Use the included hex key to remove or change the blade. Insert it into the blade spindle clamping screw and turn right to loosen and remove the bolt, washer and blade.

Replace the blade, put on the washer, then the bolt and turn left to tighten the blade in place. There's even a place to keep your hex key right on the cord of the VersaCut so you'll always have it on hand when you need it.
