DIRECTIONS
FOR USE

BV01

Dear Customer,

Thank you and congratulations on your purchase of this ingenious device. This PestContro™ product is the latest in new technology from Lentek™. We are proud of the contributions we make in bringing a healthier environment to you, our customer. We back our product with a two (2) year warranty. Your satisfaction is very important to us.

Visit our website at: www.lentek.com and view the rest of our PestContro®, Biagianté™, Sila™ or Pet Appliance™ products. While you're there, register your new purchase, sign up to receive our newsletter, and learn more about our company.

Questions can also be asked on our website, or you can call: 1-888-3-LENTEK, or 407-857-8786 or contact your local Lentek dealer.

We look forward to serving you, now and in the future.

Enjoy the bug vac!

LENTEK WARRANTY

PestContro™

Purchase Date _____

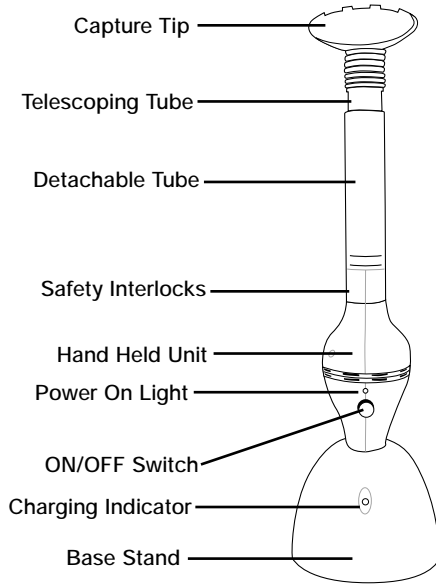

This Limited Warranty is effective upon purchase. Please complete the attached Registration and return to Lentek International.

1. Lentek International warrants this product to be free of manufacturing defects. Should any such defect develop or become evident within TWO years from the date of purchase, Lentek International will replace the entire product or, at its option, repair or replace the defective part(s) without charge.
2. Securely pack the entire unit. Be sure carton clearly identifies sender by name and address. Attach a letter or card describing the defect. Original receipt of purchase must be included in returned package for warranty coverage.
3. This warranty is void if damage or malfunction is due to abuse or failure to operate product in accordance with instructions and on recommended electrical current.

Lentek International is a leader in pest control technology. Lentek was founded in 1992 to develop products that ensure safer living. Several of Lentek's products have received recognition for superior design and function throughout the world. All of Lentek's products meet extremely high quality standards that are unmatched throughout the industry.

PRODUCT DESCRIPTION

DISPOSE OF INSECTS AND OTHER PESTS THAT VENTURE INTO YOUR HOME WITHOUT CONTACT

No more chasing bugs around your home! Lentek's Bug Vacuum is a stylish unit that creates a high-powered suction that captures and kills unwanted pests. It is an efficient and non-toxic way of getting rid of bugs, insects and other pests that fly into the house, office or porch. It is easy to operate - attach and detach!

Easy, Convenient Operation

The Bug Vacuum is uniquely designed with a trap door near the tip of the vacuum nozzle. Once the insect has been sucked up through the vacuum, the insect reaches a low voltage grid at the base. After the insect is trapped, all you have to do is snap open the vacuum and dump out the contents, and once again you will be bug free!

Practical Features

A built in safety mechanism in the vacuum instantly deactivates the low voltage grid when the nozzle is removed for emptying. The convenient and stylish base keeps your Bug Vacuum fully charged with enough battery power to suck up many bugs, ready for use in an instant. The LED indicator will tell you when your battery is getting low; all you have to do is place it in the base unit battery charger to recharge.

- ENDS MESSY SPLATTER ON WALLS AND CEILINGS
- SAFE, CONVENIENT AND SANITARY
- YOU NEVER HAVE TO TOUCH ANOTHER BUG

Excellent Benefits

The Bug Vacuum is an easy, efficient and non-toxic way of getting rid of bugs, insects, and other pests that fly or crawl into your home, porch or office. It will help keep your curtains and furniture clean and free of even the tiniest of pests that sometimes get into the folds of fabrics. The trap door feature securely traps captured insects within nozzle and prevents them from flying back out. The Bug Vacuum is a great substitute for bug sprays, and like every PestContro® product is environmentally friendly.

FEATURES:

- Uniquely designed trap door captures pests within vacuum extension
- Built in low voltage grid safely kills bugs
- Safety interlock disables grid when wand is removed for insect disposal
- Flexible rubber tip can trap bugs even in corners
- Extendable nozzle to help reach high spots
- Charging stand with LED charge indicators

CAUTION

The Bug Vac is equipped with a **safety interlock** at the base of the **detachable tube** to disable the low voltage grid when the tube is removed. **NEVER** jam the interlock in place. **DO NOT** run the Bug Vac without the tube in place. **NEVER** use water or any cleaner on the low voltage grid.

DIRECTIONS FOR USE

1. For optimum performance, charge the Bug Vac for a full 24 hours before the first use. Plug the included AC power adapter cord into the base and the adapter into a standard electrical outlet. Base charge LED light will turn red when Bug Vac is placed into base unit. Place the hand unit into the base stand with the ON/OFF switch set to the OFF position. The LED light will turn green when charged.
2. The tube assembly length can be adjusted by telescoping the inner tube in or out.
3. The Bug Vacuum activates by pushing the ON/OFF button towards the base end of the hand unit.
4. Vacuum up the nuisance insect by activating the Bug Vac and placing the **capture tip** over the insect. Some insects might require a nudge with the Bug Vac nozzle to dislodge.
5. Allow the Bug Vac to run for 10 to 15 seconds after the insect has been captured to assure exposure to the low voltage grid at

the base of the hand held unit. Trap door will shut to keep insect in tube.

6. To empty, turn the Bug Vac to the off position. Remove the **detachable tube** and dispose of the insect. The low voltage grid is automatically disabled by removing the **detachable tube**.
7. If you prefer to release the captured live insect out of doors, **DO NOT** push the **detachable tube** all the way down on the base. This will leave the safety interlocks open, disabling the low voltage grid.

SPECIFICATIONS
