baby™

## ***Congratulations!***

*You now own the Diaper Genie® Complete diaper disposal system. To ensure your system works best, we encourage you to read these instructions carefully and keep this guide for future reference.*

Your Diaper Genie® Complete comes with a refill. When you are ready for your first Diaper Genie® refill you can buy refills that hold up to 270\* diapers or you can stock up on multi-packs and save.

**The Diaper Genie®  
7-layer refill with barrier  
technology locks in germs.**

For Optimal Performance,  
Use Diaper Genie® Refills

HELPFUL HINTS

# diaper genie<sup>®</sup> COMPLETE

- ✓ Emptying the Diaper Genie<sup>®</sup> Complete pail frequently helps maintain room freshness.
- ✓ Like everything in baby's room, you should clean your pail periodically.  
For best results follow the instructions for use on your disinfecting and deodorizing cleansers.

---

Keep carbon filter out of reach of children.

**CONTENTS**

<b>A</b> - Head	<b>F</b> - Canister Button
<b>B</b> - Main Body	<b>G</b> - Foot Pedal
<b>C</b> - Canister	<b>H</b> - Carbon Filter
<b>D</b> - Lid	<b>I</b> - Carbon Filter Holder
<b>E</b> - Cutter	<b>J</b> - Diaper Genie Refill

**GETTING STARTED**

- **No assembly required!**
- **Pail is ready-to-use after removing tape adhesive on head (A) and then following these steps:**

Press on the foot pedal (G) to check that Lid (D) and the inside clamps open and close with ease. If they do, remove the carbon filter (H) from the plastic wrap and slide into carbon filter holder (I). For optimal performance, replace carbon filter, every 3 months.

If Canister (C) gets detached from Main Body (B), place Canister (C) into the base at angle. Push forward to close. A slight spacing may be visible between Canister (C) and Main Body (B). This is normal and will not impact product odor performance.

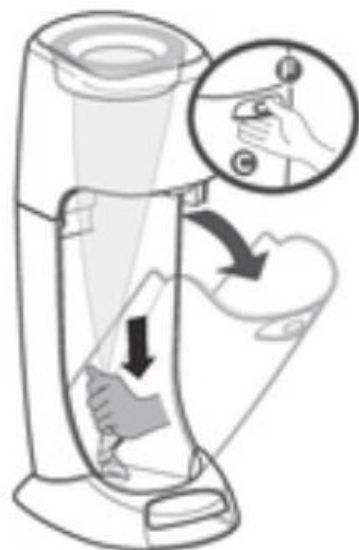

## REPLACE REFILL

Make sure that Diaper Genie® Refill is right side up. Pull plastic tab on Diaper Genie® refill (J) to remove plastic seal. Pull film up and out of refill and push down through center hole. Knot the end of the film.

Press down on foot pedal (G). Place refill into pail and press down slightly to secure in place. Release the foot pedal.

Press the button (F) to open the canister (C). Grab the knotted film from the closed clamps and pull it to the bottom of the pail. Pull a little extra film to prevent stress on the clamp for optimal functionality.

## HOW TO USE

Press on the foot pedal (G) to open the system. Drop in the rolled dirty diaper. Release the foot pedal to close.

Note: If Lid does not open, Diaper Genie Refill bag might need to be emptied.

## HOW TO EMPTY

Press button (F) to open the canister (C). Reach in to grasp the film above the diapers. Pull enough film to be able to tie a knot. Gather the film into the cutter (E). Pull gently upward to cut the film. Tie knot and throw away bag filled with dirty diapers.

Knot the film where it was just cut. Pull the film to the bottom of the pail. Pull a little extra film to prevent stress on the clamp for optimal functionality. Close canister (C).
