

## Tech specs

### cold water

- cold tank: 3.6 Liter
- cold temp: 47°F
- cooling power: 100W
- cooling method: compressor
- output: 2.0L/H

### hot water

- 1 liter storage tank
- hot temp: 185°F
- heating power: 420W

### sterilization

- ozone

### tank material

- stainless steel

### drip tray

- removable
- no drain

### filtration

- 1. sediment filter
- 2. carbon activated- NSF 42, 53
- eliminates chlorine, lead, rust, and bacteria
- lifespan: 1500 gallons or 6 months
- 0.5 gallon per minute flow rate

### what's in the box

- avalon A5 bottleless water dispenser
- 1 sediment filter
- 1 activated carbon block filter
- installation kit - no technician required
- use and care guide
