Microphone setting up guide:
**For Windows computer**

1. Insert Microphone 3.5mm plug into the 3.5mm audio interface on your PC (Generally the color of the PC audio interface is pink)

2. Right-click the "Volume" icon on the taskbar, and select "Recording Devices"

3. Enter the "Recording" tab select "Microphone" which is the system default recording device, and then click "Properties"
4. Choose the "Levels" tab, drag the Volume slider to 80, and then drag the Boost slider to 0 or +10.0 dB.

5. Microphone can work after finishing Step 4. If you want to test it and let the speaker play the sound of your Microphone, switch to the "Listen" tab and enable option "Listen to this device" to test the microphone. Sound delay or disturbance may occur on the microphone so that it cannot be applied to party or speech in which occasions AMP or professional sound card are needed.
