Microphone Sensitivity	-42dB ±3dB
Frequency Range	20-20KHz
Input	DC 5V
Charging Time	1.5 hours
Play Time	Up to 8 hours
Talk Time	Up to 8 hours
Battery Type	Li-Polymer (2 × 60mAh)
Operating Range	Up to 10m / 33ft
Weight	13g / 0.46oz

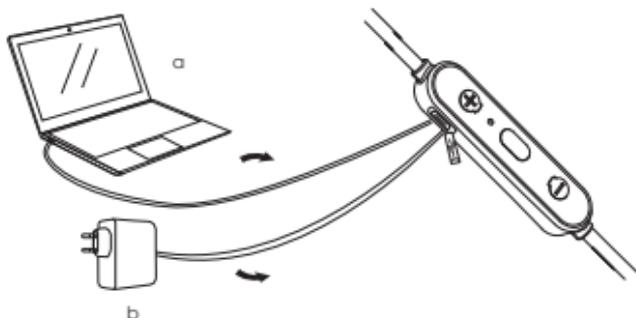

Product Diagram

Getting Started

Charging

Fully charge your earbuds before first use. Before charging, make sure the earbuds are turned off. To charge, simply connect one end of the micro-USB cable to a USB charging port and the other end to the input port on the earbuds. When the red LED indicator light turns blue, your earbuds are fully charged and ready for use. Charging takes around 1.5 hours.

Turning On / Off

Turn On	Press and hold the multi-function button until the LED indicator flashes blue, and you will hear an ascending tone
Turn Off	Press and hold the multi-function button until the LED indicator flashes red, and you will hear a descending tone

Pairing

Starting with your earbuds powered off:

1. Press and hold the multi-function button until the LED flashes blue and red alternately

2. Turn on the pairing function of the device you want to pair with the earbuds
3. In the list of available devices, find and select "AUKEY EP-B40"
4. If a code or pin is required for pairing, enter "0000"

Simultaneous Pairing with Two Devices

1. Follow the instructions in the "Pairing" section to pair the earbuds with Device A
2. Once paired, disable wireless function on Device A and turn off the earbuds
3. Follow the instructions in the "Pairing" section to pair with Device B
4. Once paired with Device B, reactivate wireless function on Device A and select "AUKEY EP-B40" in the list of paired devices
5. You can now make and receive calls from either of the two paired devices

Notes

- To reset the earbuds, power on the earbuds and then hold volume +, volume -, and multi-function button simultaneously until the LED indicator flashes red for 2 seconds. Once the pairing list is cleared, you will hear a tone; and when you turn on the earbuds next time, the earbuds will automatically enter into pairing mode
- The earbuds will automatically shut down after 5 minutes in pairing mode if no devices are paired
- If your paired device is turned off or manually disconnected, the earbuds LED indicator will flash blue once every 8 seconds and the earbuds will shut down after 5 minutes
- The maximum wireless operating range is 33ft (10m). If you exceed this range, the earbuds will disconnect from your paired devices and you will hear a tone. The connection will be re-established once you re-enter the wireless range within 15 minutes. The earbuds will automatically reconnect to the last-paired device. To connect with other devices, repeat the previous "Pairing" steps

Music and Calls Control

Making Calls

Once paired with your smartphone, making and answering phone calls can be managed via the in-line remote

Answer / End a call	Press the multi-function button once
Redial last called number	Double press the multi-function button in standby mode
Reject an incoming call	Hold the multi-function button for more than 1 second
Mute / Resume a call	Press and hold the volume - for 2 seconds during a call
Voice switch	Press and hold the volume + for 2 seconds during a call to switch between the earbuds and your phone for talking
Device switch	Press and hold the multi-function button for 2 seconds during a call to switch between two mobile phones

Streaming Audio

Once paired, you can wirelessly stream audio from your device to your earbuds. Music will automatically pause when you receive an incoming phone call, and resume once the call has ended.

Play / Pause	Press the multi-function button once
Volume Control	Press the volume + / -
Next / Previous Track	Press and hold the volume + / - for 2 seconds
EQ Switch	Double press multi-function button to switch vocals / treble / bass

LED Indicator	Status
Blue & red flashing alternately	Pairing mode
Blue flashing twice every 5 seconds	Standby mode
Blue flashing twice every 8 seconds	Playing music
Blue flashing once every 8 seconds	Disconnected / In call
Blue flashing once every second	Incoming call
Red flashing twice every 8 seconds	Low battery
Red	Charging
Blue (after charging)	Fully charged

FAQ

The earbuds are on, but not connecting with my device

To connect the earbuds with your device, you need to enter pairing mode. Follow the instructions in the "Pairing" section of this manual.

I have established a connection with my smartphone but can't hear any sound

Double-check the volume level on your smartphone and the earbuds. Some smartphones require you to set up the earbuds as an audio output device before the audio can be transmitted. If you are using a music player or other device, please make sure it supports the A2DP stereo music profile.

The sound is not very clear or the caller cannot hear my voice clearly

Adjust the volume on your smartphone and the earbuds. Try getting closer to your smartphone to rule out the possibility of interference or wireless range-related issues.

Can I use the earbuds while they are charging?

No.

What is the wireless range of the earbuds?

The maximum range is 33ft (10m). However, the actual range will depend on environmental factors. For optimal performance, keep your devices connected with the earbuds within a 15ft-25ft range and make sure that there are no major obstacles (like reinforced steel walls) between the earbuds and your devices.

My earbuds won't turn on

Try charging the earbuds for a while. If the earbuds still won't power on, please contact our support team at the address below.

Product Care & Use

- Please keep away from liquids and extreme heat
- Do not use the earbuds at high volume for extended periods, as this may cause permanent hearing damage or loss

Warranty & Customer Support

Notice for US

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation

FCC rules

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Relocate the receiving antenna
- Increase the separation between equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio / TV technician for help
