What's in the box

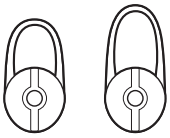

Headset

USB charge cable

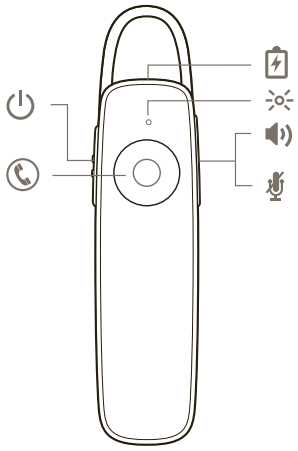

Earloop

Eartips

Headset Overview

	Power button
	Call button
	Charge port
	Headset LED (indicator light)
	Volume/Mute button

Pair

Get Paired

The first time you power on your headset, it begins the pairing process.

1 Wearing your headset, power it on. You hear “pairing” and the headset indicator lights flash red and white.

2 Activate Bluetooth® on your phone and set it to search for new devices.
- **iPhone®** Settings > Bluetooth > On*
- **Android™** Settings > Bluetooth: On > Scan for devices*

NOTE **Menus may vary by device.*

3 Select “PLT_M180.”
If necessary, enter four zeros (0000) for the passcode or accept the connection.

Once successfully paired, you hear “pairing successful” and the headset indicator lights stop flashing.

Pair another phone

After pairing your headset to your phone, you may want to pair another phone.

1 Power on your headset.

2 Press and hold the Call button until you hear "pairing" or the indicator light flashes red and white.

3 Activate Bluetooth on your phone and set it to search for new devices.

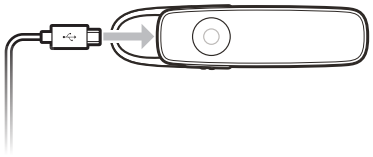

4 Select “PLT_M180.”
If necessary, enter four zeros (0000) for the passcode or accept the connection.

Once successfully paired, you hear “pairing successful” and the headset indicator lights stop flashing.

Charge and fit

Charge

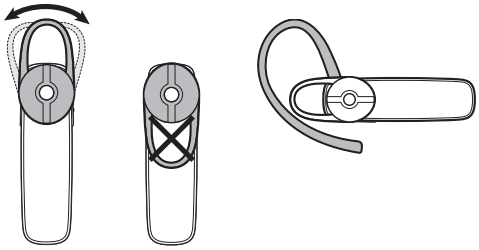

Your new headset has enough power to pair and make a few calls. It takes two hours to fully charge the headset; the indicator light turns off once charging is complete.

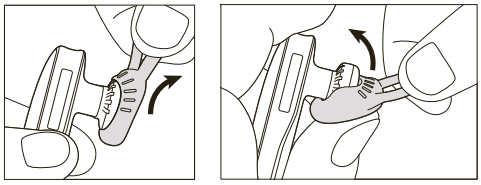

Adjust the Fit

The eartip has a thin loop that bends to gently tuck into the contours of either ear.

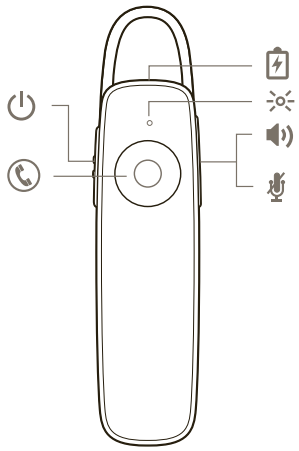

1 Rotate the eartip on the headset or add the optional clip-on earloop to adjust the fit.

2 Replace the gel eartip with one of the two alternate sizes, if it feels loose or tight in your ear.

The Basics

Make/Take/End Calls

Answer a call

Choose:

- Say “answer” after call is announced, or
- Tap the Call button

Answer a second call

First, tap the Call button to put the first call on hold and answer the second call. To switch between calls, press the Call button for 2 seconds. To end the second call and retrieve the first call, tap the Call button.

End a call

Tap the Call button to end current call.

Reject a call

Choose:

- Say “ignore” after call is announced, or
- Press Call button for 2 seconds

Redial

To call your last number dialed, double tap the Call button.

Use call waiting

First, tap the Call button to put the first call on hold and answer the second call. To switch between calls, press the Call button for 2 seconds. To end the second call and retrieve the first call, tap the Call button. Call waiting does not work between two paired phones.

Voice dial (phone feature)

If your smartphone has a voice-enabled assistant, press the Call button for 2 seconds and wait for phone prompt.

Mute

You can mute the microphone during a conversation.

During a call, tap the Volume/Mute until you hear “mute on” or “mute off.” While the microphone is muted, an alert repeats every 15 minutes.

Adjust the Volume

Tap the Volume/Mute button to cycle through preset levels.

Listen to music and more

If your phone also has the Bluetooth A2DP (Advanced Audio Distribution Profile) stereo music feature, then your music, podcasts, favorite Internet radio and other streaming audio can be heard through this headset.

More Features

Use two phones

Multipoint technology lets you pair a second phone and answer calls from either phone.

Once you have paired your two phones, it's easy to answer calls from either phone.

When on a call, you will hear a ringtone notification of the incoming call from the second paired phone. To answer a second call from the other phone, you must end the current call (tap Call button) so the new call automatically answers.
If you choose to not answer the second call, it will go to voicemail.

Save Power

If you leave your headset powered on but out of range of your paired phone for more than 90 minutes, your headset will conserve its battery power by entering into a DeepSleep™ mode.

Once back in range with your phone, tap the Call button to exit DeepSleep mode. If your phone is also ringing, tap the Call button again to answer your call.

Decipher the Lights

Your headset has an indicator light that flashes in response to a change in status or after a button press.

Some examples of what you will see are:

- Solid red until charging complete and then off
- Flashing red and white during pairing
- Triple red flash when less than 10 minutes of talk time
- Triple white flash at incoming call

Hear it Whisper

Your headset tells you about status changes. For example:

“Power on”

“Pairing successful”

“Talk time (x) hours”

“Mute on”

“Lost connection”

“Recharge headset”

Disable voice commands

This headset speaks and understands English. If you prefer to use the Call button to answer or reject calls, you can disable the voice commands “answer” or “ignore.”

With the headset powered on, simultaneously press the Call button and Volume (+/–) button until you see the indicator light flash blue two times. Repeat these steps to reactivate the commands.

Technical Specifications

Talk time	Up to 7 hours*
Standby time	Up to 11 days*
Headset weight	7 grams
DeepSleep technology	• Activates when paired headset is out of range for over 90 minutes • Provides up to 180 days* of battery readiness
