zipScope | USB Digital Microscope

Microscopic world at your fingertips

The zipScope is an easy to use USB digital microscope that enables you to see magnified images or videos right on the computer screen. The zipScope has 8 built-in LED lights and two light intensity settings, magnification range of 10x-200x, snap shot button for image capture, large focus wheel, and rubberized anti-slip coating for durability. An adjustable metal stand and image and video capture software is included.
