

# IMPORTANT SAFETY INSTRUCTIONS

- Flammable. Contains pressurised butane gas.
- Do not use near fire or flames, including cigarettes.
- Protect from sunlight and do not expose to temperatures over 122°F (50°C).
- Do not pierce, puncture or incinerate the butane cartridge even after it is empty.
- If using aerosol sprays or flammable liquids such as hairspray, allow at least 5 minutes before igniting the curling iron to let flammable vapours disperse.
- When igniting the curling iron, hold it away from hair and clothing. Do not ignite while curling iron is in the hair.
- Do not cover the curling iron with the hand while igniting.
- Do not leave unattended while switched on.
- Careful adult supervision is required when the appliance is used on or near children or some disabled persons.
- Keep out of the reach of children.
- Allow the appliance to cool before storing away.
- Do not place the appliance on any heat sensitive surfaces whilst in operation.
- Do not immerse the appliance in water or other liquids. Do not allow to become wet.
- This appliance should only be used as described within this instruction booklet. Please retain for reference.

- Always inspect the appliance before use for noticeable signs of damage, or if the appliance has been dropped. In the event of damage contact the Conair Service Centre (refer to the Warranty Section for further information).

## CERAMIC CURLING IRON

The new Cordless Butane curling iron by Conair® is a professional high-temperature ceramic coated curling iron for use at home or on the move.

This high-temperature portable ceramic coated curling iron has a flawlessly smooth surface that glides through the hair for a perfect finish.

## FEATURES:

- High-Temperature Ceramic Coated Barrel
- Cool Tip
- Cordless
- Protective Heat Shield
- Conair® Thermacell® butane cartridges

## INSTRUCTIONS FOR USE

To insert or change the butane cartridge

- Remove the base of the curling iron handle.
- Remove the cap from the butane cartridge.
- Place the cartridge into the handle, the top inserted first.
- Twist the cartridge clockwise and screw in place.
- Replace the handle base.

## TO SWITCH THE CURLING IRON ON

- Push the ON switch and wait for approximately 5 seconds.
- Depress the start switch on the handle of the curling iron several times.
- The curling iron should now begin to heat up.
- Wait for 8 to 10 minutes, the curling iron is now ready for use.

## CURLING

### For best results

- Section dry hair evenly. Pressing the automatic curl release, place curling iron midway up the hair section. Release automatic curl release to hold hair in place. Gently slide curling iron down to hair ends.

Wind the hair up as far as you want it curled. For tighter, bouncier curls, roll less hair. For looser, free flowing curls, roll more hair.

**IMPORTANT:** Take care to avoid the hot surfaces of the appliance coming into direct contact with the skin, in particular the eyes, ears, face and neck.

- Repeat as necessary.
- Allow the hair to cool before combing through.
- After use push the OFF switch, allow the appliance to cool and replace the protective heat shield.

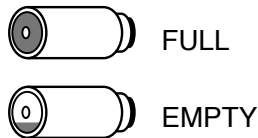

## AFTER CURLING

At the end of curling, push the OFF button and replace the protective heat shield, taking care not to allow the hot barrel of the curling iron to come into contact with the skin.

## TO CHECK LEVEL OF BUTANE CARTRIDGE

Check the level of fuel left in the butane cartridge by looking at the clear base of the cartridge while in a horizontal position (see figure 1). If a cell is empty, replace with a new Conair® Thermacell® butane cartridge.
