

How to use vr headset box with android and iPhone mobiles

What is a VR Box ?

Definition of VR Box Headset for Beginners

Virtual reality VR Box headset is a head-mounted device that you wear over your eyes like a pair of goggles. This vr device provides virtual reality for the wearer. The goal of the VR headset is too provide immersive virtual reality experience. In VR games, your point of view is your character's point of view; most VR headsets track your head movement, so that wherever you look, your character looks, too.

Uses of VR Headsets in Various Fields

1.Used in Medical training

2.Military training

3.Industrial training

4.In education field

5.Showcasing the products

6.Watching your own content and other vr content from online like 360 videos, 3d side by side videos and can play vr games.

7.Virtual tourism.

How to use vr box headset with Android mobiles and iPhone

Steps to know how to use the virtual reality vr box headset with Android and iPhones mobiles.

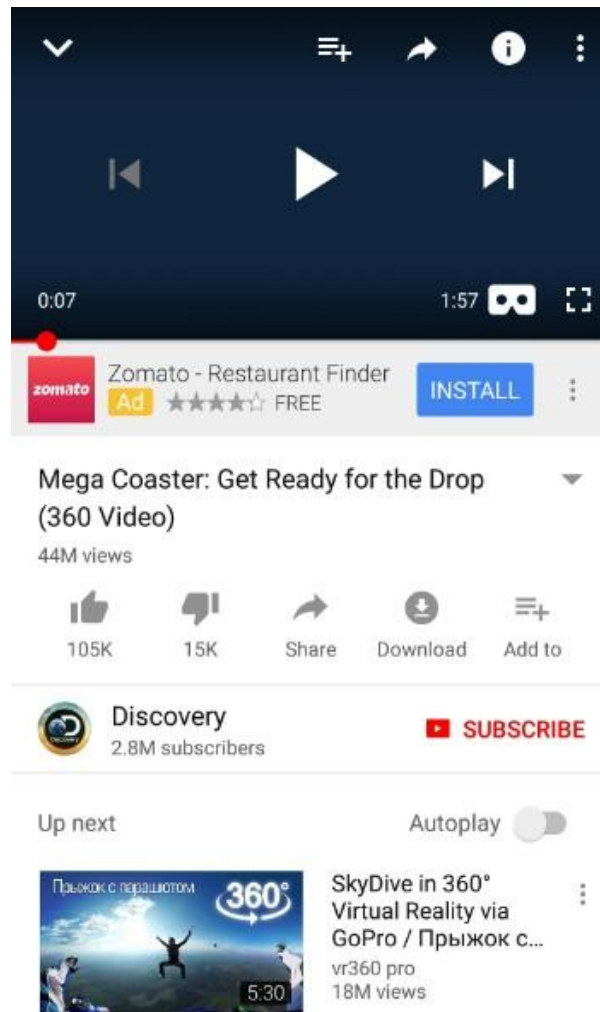

Step 1 > Check your mobile is vr compatible or not before using it with vr headset.

How to check your mobile is VR compatible or not?

Install cardboard app from play store to check vr compatibility, if the gets installed on your mobile then it is vr compatible. Download from [googleplay](#) Directly you can check for gyroscope sensor in your mobile if there is a gyroscope sensor then your mobile is vr compatible.

Step 2 > **Know how to watch 360 videos on your mobile.**

YouTube is the best source for watching 360 videos and other vr content.

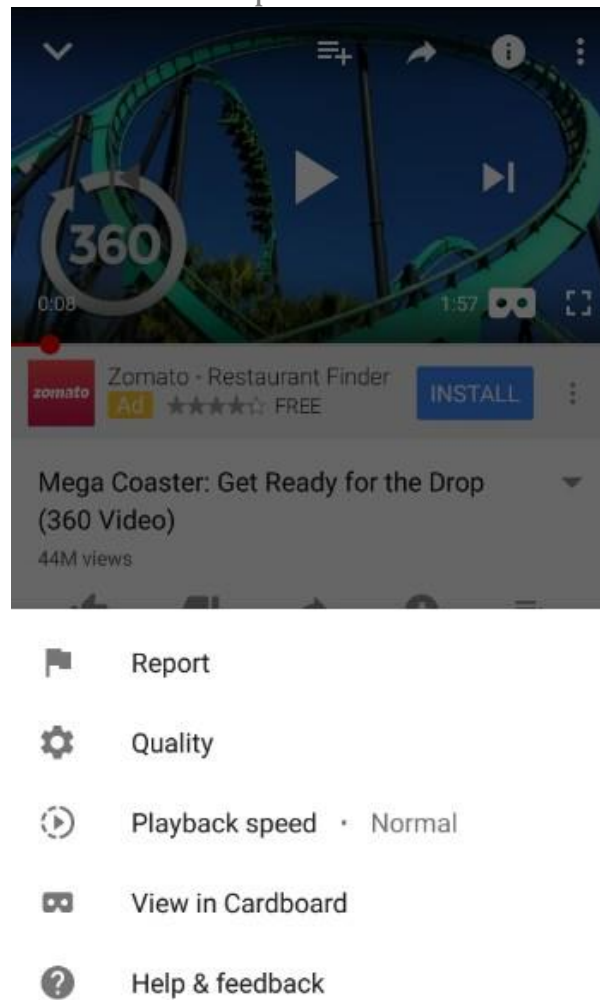

First, select any 360 videos on YouTube and open the video. On most of the mobiles, you can find the cardboard icon on the video by touching on that icon the video gets splits into two halves.

Now you can place the mobile in virtual reality headset and enjoy the vr experience of 360 videos. Do watch high-quality videos for the better vr experience.

What if in case you don't find the cardboard icon on the video. Don't worry there is an option available on YouTube. You can find three dots on the right corner of the video, by touching on the three dots a set of options will appear at the bottom

of the mobile screen from those options select view in cardboard. That's it.

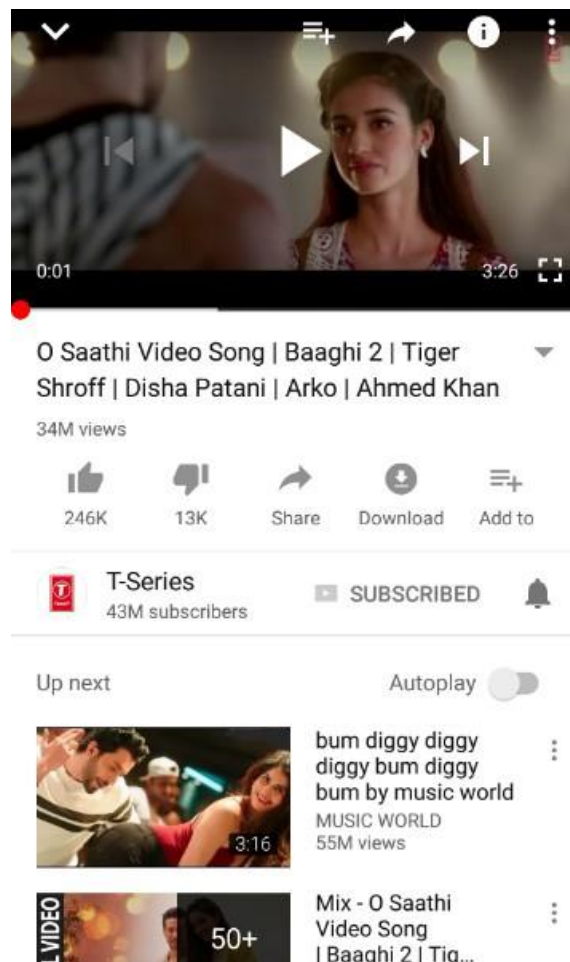

Step 3 > Know how to watch vr 3d side by side videos.

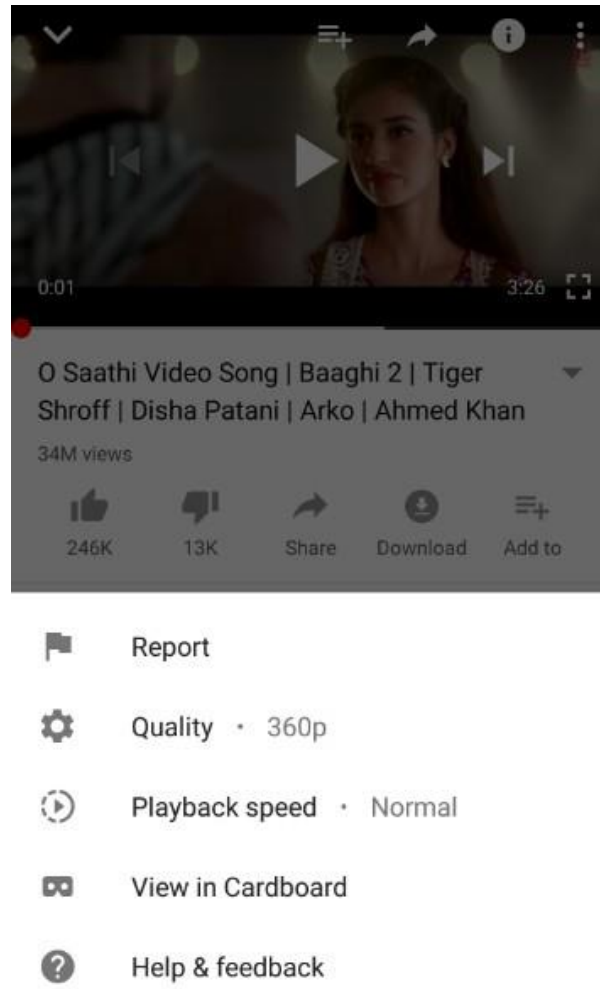

Watching 3d side by side videos is very simple when compared to other videos. Just search for 3d side by side videos, select one video at high quality and place the mobile in vr headset and enjoy the vr 3d experience.

Step 4 > Know how to watch normal movies in vr Box headset.
 Search for your favorite videos on YouTube and open the video. You can find three dots on the right corner of the video, by touching on the three dots a set of options will appear at the bottom of the mobile screen from those options select view in cardboard. That's it. Don't forget to set the quality at high at least 1080p.

After you open a video a message will display on the screen as “click to recenter”. Iruku VR headsets have the inbuilt touch button by using the touch button you can re-center the video.

Some iruku vr headsets have no touch button but it has magnetic clicker which can be used for recentering the video.

Iruku mini vr has not touch button and has no magnetic clicker but you can recenter the video by using the iruku bluetooth remote.
