Important Safety Instructions

NOTE:
This USE & CARE MANUAL provides specific operating instructions for your model. Use the Portable air conditioner only as instructed in this USE & CARE MANUAL. These instructions are not meant to cover every possible condition and situation that may occur. Common sense and caution must be practiced when installing, operating, and maintaining any appliance.

NOTE:
The power supply cord with this air conditioner contains a current detection device designed to reduce the risk of fire. Please refer to the section ‘Operation of Current Device’ for details. In the event that the power supply cord is damaged, it cannot be repaired. It must be replaced with a cord from the product manufacturer.

WARNING
For Your Safety
Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. Read product labels for flammability and other warnings.

WARNING
Prevent Accidents
To reduce the risk of fire, electrical shock, or injury to persons when using your air conditioner, follow basic precautions, including the following:

- Be sure the electrical service is adequate for the model you have chosen. This information can be found on the serial plate, which is located on the side of the cabinet.
- If the air conditioner is to be installed in a window, you will probably want to clean both sides of the glass first.
- Be sure the air conditioner has been securely and correctly installed according to the installation instructions in this manual. Save this manual for possible future use in removing or reinstalling this unit.
- The complete electrical rating of your new protable air conditioner is stated on the serial plate. Refer to the rating when checking the electrical requirements.
- Do not run air conditioner without outside protective cover in place. This could result in mechanical damage within the air conditioner.
- Do not use an extension cord or an adaptor plug.

WARNING
Electrical Information
The complete electrical rating of your new protable air conditioner is stated on the serial plate. Refer to the rating when checking the electrical requirements.

- Be sure the air conditioner is properly grounded. To minimize shock and fire hazards, proper grounding is important. The power cord is equipped with a three-prong grounding plug for protection against shock hazards.
- Your air conditioner must be used in a properly grounded wall receptacle. If the wall receptacle you intend to use is not adequately grounded or protected by a time delay fuse or circuit breaker, have a qualified electrician install the proper receptacle.
- Do not run air conditioner without outside protective cover in place. This could result in mechanical damage within the air conditioner.
- Do not use an extension cord or an adapter plug.

SAFETY PRECAUTIONS

DANGER! Avoid Serious Injury or Death

- This air conditioner contains no user-serviceable parts. Always call an authorized Electrolux servicer for repairs.
- Do not insert or place fingers or objects into the air discharge area on top of the unit.
- Do not start or stop the air conditioner by unplugging the power cord or turning off the power at the electrical box.
- Do not cut or damage the power cord.
- If the power cord is damaged, it should only be replaced by an authorized Electrolux servicer.
- In the event of a malfunction (sparks, burning smell, etc.), immediately stop the operation, disconnect the power cord, and call an authorized Electrolux servicer.
- Do not operate the air conditioner with wet hands.
- Do not pull on the power cord.
- Do not drink any water that is drained from the air conditioner.
SAFETY PRECAUTIONS

**CAUTION! Avoid Injury or damage to the unit or other property**

- Provide occasional ventilation during use. Do not direct airflow at fireplaces or other heat related sources as this could cause flare ups or make units run excessively.
- Do not climb on or place objects on the unit.
- Do not hang objects off the unit.
- Do not place containers with liquids on the unit.
- Turn off the air conditioner at the power source when it will not be used for an extended period of time.
- Periodically check the condition of the unit's installation accessories for any damage.
- Do not apply heavy pressure to the radiator fins of the unit.
- Operate the unit with air filter in place.
- Do not block or cover the intake grille, discharge area and outlet ports.
- Ensure that any electrical/electronic equipment is one yard away from the unit.
- Do not use or store flammable gases near the unit.

READ THIS SECTION BEFORE ATTEMPTING TO OPERATE AIR CONDITIONER.

Unit must be upright for one hour prior to operating.

**Operation of Current Device**

Plug in & press RESET

The power supply cord contains a current device that senses damage to the power cord. To test your power supply cord do the following:

1. Plug in the Air Conditioner.
2. The power supply cord will have TWO buttons on the plug head. Press the TEST button. You will notice a click as the RESET button pops out.
3. Press the RESET button. Again you will notice a click as the button engages.
4. The power supply cord is now supplying electricity to the unit. (On some model, this is also indicated by a light on the plug head)

**NOTE:**

- Do not use this device to turn the unit on or off.
- Always make sure the RESET button is pushed in for correct operation.
- The power supply cord must be replaced if it fails to reset when either the TEST button is pushed, or it cannot be reset. A new one can be obtained from the product manufacturer.
- If power supply cord is damaged, it CANNOT be repaired. It MUST be replaced by one obtained from the product manufacturer.
FCC Statement

FCC Statement

FCC I Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by tuning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the equipment into an outlet other than the one used for the receiver.
- Consult the dealer or an experienced radio/TV technician for assistance.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC CAUTION: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Host device Labeling

This device includes the following module.
Contains FCC ID: 2AIBX-WD115

RF exposure statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum 20 cm between the radiator and your body. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter unless authorized to do so by the FCC.

INDUSTRY CANADA (IC) STATEMENT

This Class B digital apparatus complies with Canadian ICES-003.
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

RF Exposure

The antenna (or antennas) must be installed so as to maintain at all times a distance minimum of at least 20 cm between the radiation source (antenna) and any individual. This device may not be installed or used in conjunction with any other antenna or transmitter.

RF Exposure

L'antenne (ou les antennes) doit être installée de façon à maintenir à tout instant une distance minimum de au moins 20 cm entre la source de radiation (l'antenne) et toute personne physique.

Host device Labeling

This device includes the following module.
Contains IC: 21700-NIUX

Host dispositif d'étiquetage

Ce dispositif inclut le module suivant. Contient module émetteur IC: 21700-NIUX

This is the location of the module.
**Product Registration**

**Record Your Model and Serial Numbers**

Record in the space provided below the model and serial numbers. On all models, the serial plate is located on the side of the cabinet.

Model No. ____________________________

Serial No. ____________________________

**Register Your Product**

The self-addressed PRODUCT REGISTRATION CARD should be filled in completely, signed and returned to the Frigidaire Company.

---

**Normal Sounds**

**Sound of Rushing Air**

At the top of the unit, you may hear the sound of rushing air being moved by the fan.

**Gurgle/Hiss**

“Gurgling or hissing” noise may be heard due to refrigerant passing through evaporator during normal operation.

**High pitched Chatter**

Today's high efficiency compressors may have a high pitched chatter during the cooling cycle.

**Vibration**

Unit may vibrate and make noise because of uneven floor.

- Check all the accessories are included in the package and please refer to the installation instructions for their usage.
EXHAUSTING HOT AIR

In the COOLING Mode the appliance must be placed close to a window or opening so that the warm exhaust air can be ducted outside.

First position unit on a flat floor and make sure there’s a minimum of 12” clearance around the unit, and is within the vicinity of a single circuit outlet power source.

1. Extend either side of the hose (Fig. 3).
2. Slide the adaptor A into the exchange hole of the unit as shown on Fig. 4.
3. Install the window kit on the window and slide the adaptor B into the window slider kit and seal. (Fig. 5 & 6)

**NOTE:** Refer to page 8 about how to install the window kit.

The hose can be extended from its original length of 15” up to 59”, but it is the best to keep the length to minimum required. Also make sure that the hose does not have any sharp bends or sags. (Fig. 7)
Installation Instructions

Installation in a double-hung sash/sliding sash window

1. Cut the foam seals A (adhesive type) to the proper lengths and attach them to the window and stool (Fig. 8).

2. Open the window sash and lift the locking lever of the window slider kit (Fig. 9), then place the window slider kit on the window stool. Adjust the length of the window slider kit according to the width of window (Fig. 10).

3. Press back the locking lever to fix the length of the window slider kit then close the window sash securely against the window slider kit (Fig. 12).

4. To secure lower sash, attach sash lock with 3/8" (9.5mm) screw as shown Fig. 13.

**NOTE:** It is difficult to lock the windows with the sash lock for Vinyl-Clad windows, so you can use lock by window itself.

5. Cut the foam seal B (adhesive type) to an appropriate length and seal the open gap between the top window sash and outer window sash, as shown in Fig. 14.

6. Cut the decoration film to an appropriate length and stick on the extending rod channel (Fig. 15).

**NOTE:** If the window is too wide, you can replace the pre-installed telescopic rod with the spared extend rod or combine the 2 rods. The recommended usage of the rods are as below:

- With 280mm pre-installed telescopic rod only: available range = 560mm-780mm
- With 350mm spared extend rod only: available range = 630mm-850mm
- With the combination: available range = 850mm-1120mm

To replace the pre-installed telescopic rod with the spared extend rod, first take out the telescopic rod completely (Fig. 11 A). Then take down the cap from the pre-installed telescopic rod and put it on the spared extend rod.

To combine the 2 rods, first take out the telescopic rod completely (Fig. 11 A). Then align the 3 hooks on the extending rod to the 3 slots on the end of the telescopic rod and slide the 3 hooks into the slots, then press down the extending rod to lock the slots (Fig. 11 B). After that slide the combined telescopic rod back into the window kit (Fig. 11 C).
**Air Conditioner Features**

**CONTROL PANEL**

- **SETS FAN SPEED**
- **FILTER RESET**
- **CONNECT BUTTON**

**REMOTE CONTROL**

- **MODE SELECTOR**
- **TEMPERATURE BUTTON**
- **On/Off BUTTON**
- **FAN SPEED SELECTOR**

**To replace the battery**

1. Turn over the remote control. In the button of the remote control there is a slot. Use a coin or something like that to rotate the back cover anti-clockwise to open it. (Fig.20 & 21) Use the same way to open the protecting cover inside and take out the battery. (Fig.22) Replace the battery and reinstall the inside cover and back cover.

2. Note: Place battery in tray with POSITIVE (“+”) side facing UP.

**Battery Type:** RG15D/E-ELL (Rated Voltage: 3VDC)

**Warning:**
1. Be sure the batteries are inserted properly.
2. Do not use batteries other than the type specified.
3. Do not use old batteries with new ones.
4. Do not dispose of batteries in fire. Batteries may explode or leak.
5. To prevent damage, remove the batteries when not being used for a long time.
6. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
   (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Operating Instructions

1. Press the "modes" button until the "fan" indicator lights.
2. Press the "fan speed" button to choose the desired fan speed.
3. The fan will run at the selected speed and the display will show the room temperature.

**DRY MODE:**

- In this mode you do not need to use the exhaust adaptor hose, BUT the water collected must be discharged. See Drainage Section.
- 1. Press the "modes" button until the "dry" indicator lights.
- 2. The fan will run at low speed and the display will show the room temperature.

**ECO MODE:**

- Always have the exhaust hose attached in this mode.
The unit will run in energy saver (econ) mode when used for the first time. In this mode, the fan will continue to run for 3 minutes after the compressor shuts off. The fan then cycles on for 90 seconds at 10 minutes intervals until the room temperature is above the set temperature, at which time the compressor turns back on.

**COOLING MODE:**

- In this mode the exhaust adaptor hose MUST be used.
- 1. Press the "modes" button until the "cool" indicator lights.
- 2. Press the "-" & " + " Temp buttons for desired setting.
- 3. Press the "fan speed" button for desired fan speed.

**CHECK FILTER FEATURE:**

- This feature is a reminder to clean the Air Filter (See Care and Cleaning) for more efficient operation. The filter indicator will illuminate after 250 hours of operation. To reset after cleaning the filter, press and hold the "filter" button for 3 seconds and the light will go off.

**SELECTING FAN SPEED:**

- You can select the desired fan speed, by pressing the "fan speed" button. The fan speed will change in the sequence as the drawing on the left.

  - auto fan → lo → hi → med

  - NOTE: After choosing the fan speed as "auto fan", "lo", "med" or "hi", the corresponding fan speed indicator light will illuminate. Under Dry mode, you can not select the fan speed.

**DEACTIVATE WIFI MODULE:**

- The wifi module can be deactivated by holding the "Connect button" and " - " synchronously 3 seconds. Press the "Connect button" again to activate the wifi module again. It will take about 30 seconds for the module to initiate again.

The following instructions represent the Control Panel and some functions can only be selected by using the control panel.
Operating Instructions

(continued)

FAULT CODE:

If the display reads "AS", the room temperature sensor has failed. Contact your Authorized Frigidaire Service Center.

If the display reads "ES", the evaporator temperature sensor has failed. Contact your Authorized Frigidaire Service Center.

If the display reads "E4", the display panel communication has failed. Contact your Authorized Frigidaire Service Center.

If the display reads "P1", bottom tray is full. Carefully move the unit to a drain location, remove the bottom drain plug and let the water drain away. Restart the machine until the "P1" symbol disappears. If error repeats, call for service.

If the display reads "E7", the indoor motor has failed. Contact your Authorized Frigidaire Service Center.

DRAINAGE:

During the dry mode, you will need a garden hose (sold separately) to drain the condensate from the unit. Remove the rubber stopper from the hose connector, then screw on a garden hose to the connector as shown on Fig. 23.

The hose may then:
A. Discharge into a drain that is lower than the unit.
B. Be connected to a condensate pump (sold separately).
C. During cooling mode, please replace the rubber stopper to the hose connector to reach the maximum performance.
Operating Instructions, CARE & CLEANING

Operating Instructions (continued)

ADDITIONAL THINGS YOU SHOULD KNOW

Now that you have mastered the operating procedure, here are more features in your control that you should become familiar with.

- The "Cool" circuit has an automatic 3 minutes time delayed start if the unit is turned off and on quickly. This prevents overheating of the compressor and possible circuit breaker tripping. The fan will continue to run during this time.
- Temperature can be set between 60 °F and 90 °F (16 °C and 32 °C).
- The control is capable of displaying temperature in degrees Fahrenheit or degrees Celsius. To convert from one to the other and back, press and hold the "TEMP" Up (+) and Down (-) buttons together for 3 seconds.
- There is a 2-Second delay for the compressor shutting down when selecting "FAN ONLY". This is to cover the possibility of having to roll through to select another mode.
- After a power outage, the unit will memorize the last setting and return the unit to the same setting once power is restored.
- Indoor operating temperature range for this product is 60 °F to 95 °F (16 °C to 35 °C).
- Wifi module can be shut down by holding the “wifi” button and “-” button simultaneously for 3 seconds.
- During normal operation, the unit’s display will show room temperature but when the room temperature is over 99 °F (37 °C) the display will show "HI".
- After 60 seconds of control inactivity the display and indicator lights will turn off. Press any button on the control panel or remote control and the display will resume.
- This unit have a anion generator which can be turn on/off by using the “Clean air" feature in the APP. When this feature is "ON", the electronic air purifier is energized to remove pollen and impurities from the air. (This feature can be activated on the APP ONLY)

CARE & CLEANING

Clean your air conditioner occasionally to keep it looking new. Be sure to unplug the unit before cleaning to prevent shock or fire hazards.

Air Filter Cleaning

- This unit has four filters, they are located on the back of the unit. Grasp the filters tab and pull off the filters one by one(Fig.24).
- Wash the filter using liquid dishwashing detergent and warm water. Rinse filter thoroughly. Gently shake excess water from the filter. Be sure filter is thoroughly dry before replacing.
- Or, instead of washing you may vacuum the filter clean.
- Replace the filter after the filter is dry.

Cabinet Cleaning

- Be sure to unplug the air conditioner to prevent shock or fire hazard. The cabinet and front may be dusted with an oil-free cloth or washed with a cloth dampened in a solution of warm water and mild liquid dishwashing detergent. Rinse thoroughly and wipe dry.
- Never use harsh cleaners, wax or polish on the cabinet front.
- Be sure to wring excess water from the cloth before wiping around the controls. Excess water in or around the controls may cause damage to the air conditioner.

Winter Storage

If you plan to store the appliance during the winter, cover it with plastic or return it to its carton.
Before calling for service, review this list. It may save you time and expense. This list includes common occurrences that are not the result of defective workmanship or materials in this appliance.

If These Solutions Fail, Call 1-800-944-9044(US)/1-800-265-8352(Canada) For Frigidaire Service.
Major Appliance Limited Warranty

Your appliance is covered by a limited one-year warranty and a limited 2-5 year warranty on the sealed system (the compressor, condenser, evaporator and tubing). For one year from your original date of purchase, Electrolux will pay all costs for repairing or replacing any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used and maintained in accordance with the provided instructions. From the second to the fifth year from your original purchase date, Electrolux will repair or replace any parts in the Sealed Refrigeration System (compressor, condenser, evaporator and tubing) that prove to be defective in materials or workmanship. In years 2-5, the consumer will be responsible for diagnostic, labor and parts costs as well as any removal, transportation and reinstallation expenses which are incurred during service on components other than those covered under the Sealed Refrigeration System 5-year warranty.

Exclusions

This warranty does not cover the following:

1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased "as-is" are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumables, or knobs, handles, or other cosmetic parts.
11. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
12. Damages to the finish of appliance or home incurred during installation, including but not limited to floors, cabinets, walls, etc.
13. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.
14. Limitations and/or restrictions on smart appliance connectivity outside Electrolux's control including, but not limited to, software incompatibility, inadequate home wireless network capability/range and internet availability.

Disclaimer of Implied Warranties; Limitation of Remedies

Customer's sole and exclusive remedy under this limited warranty shall be product repair or replacement as provided herein. Claims based on implied warranties, including warranties of merchantability or fitness for a particular purpose, are limited to one year or the shortest period allowed by law, but not less than one year. Electrolux shall not be liable for consequential or incidental damage such as property damage and incidental expenses resulting from any breach of this written limited warranty or any implied warranty. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so these limitations or exclusions may not apply to you. This written warranty gives you specific legal rights. You may also have other rights that vary from state to state.

If You Need Service

Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained by contacting Electrolux at the addresses or phone numbers below.

You will be responsible for any service charges incurred due to limitations and/or restrictions on smart appliance connectivity outside Electrolux's control including, but not limited to, software incompatibility, inadequate home wireless network capability/range and internet availability.

This limited warranty only applies in the USA and Canada. In the USA, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
