1. Apple Watch Series 2 has a water resistance rating of 50 meters under ISO standard 22810:2010. This means that it may be used for shallow-water activities like swimming in a pool or ocean. It is also safe to wear it while showering or in a hot tub. However, Apple Watch Series 2 should not be used for scuba diving, waterskiing, or other activities involving high-velocity water or submersion below shallow depth.
2. Apple Watch Series 1 has a water resistance rating of IPX7 under IEC standard 60529. Apple Watch Series 1 is splash and water resistant, but submerging Apple Watch Series 1 is not recommended.
3. Apple Watch battery testing was conducted by Apple in August 2016 using preproduction Apple Watch Series 1, Apple Watch Series 2, and Apple Watch Edition, each paired with an iPhone; all devices were tested with prerelease software. Battery life varies by use, configuration, and many other factors; actual results will vary. See [www.apple.com/batteries](http://www.apple.com/batteries) and [www.apple.com/watch/battery.html](http://www.apple.com/watch/battery.html) for more information.

Some features are not available in all regions or all languages. Requires iPhone 5 or later.

To learn more about wearing Apple Watch, getting a good fit, potential skin sensitivity, and proper care and cleaning, [click here](#).

All models come in distinct case and band combinations. Sport, Woven Nylon, stainless steel, and leather bands are all compatible with all Apple Watch models.
