

Compatible devices

COMPATIBLE CPU COOLERS:

The FX-9000 series processors require a liquid thermal solution that meets or exceeds a Theta-ca of $<0.10\text{C/W}$ and is compatible with the AM3+ socket. Some examples of compatible coolers are the Antec KUEHLER H2O 920, and the Cooler Master Seidon 120V.

The current compatible motherboard list is as follows:

The FX-9000 series processors require a motherboard that supports 220W CPUs.
