Step 15: If you have any problems connecting or configuring this device please contact our Tech Support at 1-888-436-0657.
Quick Start Guide

Connect the Modem to a Computer

Configure the Modem for AT&T

Configure the Modem for All Other Service Providers

Configure Wireless Connection & Security

No note: Compatible with Macintosh, Linux and Windows.

This Quick Start Guide will walk you through the easy steps to set up your Wireless DSL Modem.

During this process, we'll show you how to:

You will need the following items from your Actiontec Quick Start Kit:

You will also need to know your DSL Username and Password provided by your Internet Service Provider.

Wireless DSL Modem Model# GT784WN

Step 1
Open a Web browser (Netscape Navigator or Internet Explorer, for example). In the address bar, enter http://192.168.0.1 then press Enter on the keyboard.

Step 2
The “Main Menu” screen appears. Select All other Service Providers Click Here for Auto Detection.

Step 3
The “Welcome” screen appears. Click Next.

Step 4
The Modem is now detecting your Internet provider’s settings. This process can take up to 3 minutes.

Note: If this screen does not appear, make sure your Ethernet port is configured for Dynamic IP.

Congratulations!
You have successfully installed your DSL Modem. You can now access the Internet.

Step 5
In the next window, enter your primary Username and Password provided by your ISP. Click Next.

Note: When you open your Web browser you may get a page cannot be displayed error. This is normal and will not effect the instructions in step 1.

Hint: Your Username may be your main e-mail address.

If you have any problems connecting or configuring this device please contact our Tech Support at 1-888-436-0657

Quick Start Guide

Configure the Modem for All Other Service Providers

Configure Wireless Connection & Security

Step 1
Click the YES button.

Step 2
Select a name for your wireless network and enter it in the “ESSID” field. Then click NEXT to continue.

Step 4
Select the type of wireless security that you want to use. Actiontec recommends using WPA & WPA2. The following steps will show you how to enable WPA & WPA2 wireless security.

Step 5
Enter in a password or pre-shared key. The key must be at least 8 characters long. Click NEXT to continue.

Step 6
The “Congratulations” screen appears. The DSL Light will glow SOLID Green and the Internet Light will flicker Green indicating Internet activity.

It is recommended that you secure your wireless network by clicking Yes. If you choose not to secure your network, click No and you will have completed the installation.

Note: All of your other wireless devices will need to support that same type of wireless security chosen in order to connect to your wireless network.

Note: The Wireless Wizard can also be run from the Wireless Basic Setup page of the Modem’s GUI.
