Enable the GPS permission and setting for the Danale APP

Note: Please enable the GPS permission and setting for Danale APP, or the WIFI SSID on the Danale APP maybe be blank.

Take Android 9 system as an example

1 Set the permission for the Danale APP:
Settings -> Permissions -> Danale APP -> Get location info -> Accept
2 Enable the GPS

1. Settings -> Additional settings -> Privacy -> Location -> Location access

2. Swipe down notification > Find GPS > Enable
