Download The Amazfit App

The Amazfit app is available for iOS in the Apple App Store and for Android in the Google Play Store, please search for "Amazfit" and install the app.

Or visit www.amazfit.com/setup

Connect Your Device

Make sure you have Bluetooth activated on your phone, open the Amazfit app and follow the instructions in the app to connect it to your Amazfit unit.

Charging

Connect the charger base to the USB connector charger, then remove the main unit from the wristband and place it on the charger base, with the unit's blank side (without text) facing up. When the white indicator light on the middle of the base flashes, it indicates the unit is being charged. The light will stop flashing when charging is completed.

Assembly

1. Moon Beam wristband

Open the metallic ring on the wristband by pushing the button at the back of the band in the direction indicated by an arrow.

2. Equator wristband

Warranty and Return Policy

All Amazfit products are covered by a 12 month limited warranty.

User Guide

I'm still having trouble connecting to my device. What do I do next?

Your connectivity issues could be a result of the following:

Check distance: Place the Amazfit device close to or on top of your screen and try connecting again.

Check battery level: If you cannot connect, make sure your Amazfit device is fully charged. Place your device on the charger base for 20 minutes, remove from the charger base and try connecting again. (Please be sure the unit is placed text side down on the charger base.)

Restart Application: Force close the Amazfit app, reopen the app and try pairing again. To close the Amazfit application:

iOS

- Double-click the Home button to see your most recently used apps.
- Swipe right or left to find the app that you want to close.
- Swipe up to close.
- Restart app and try connecting again.

Android

- Open the **Applications** tray and tap the **Settings** icon. Then locate and tap **Applications**.
- Tap **Manage Applications**. In the list of running applications, select the application and tap **Force Stop**.
- Restart app and try connecting again.

Un-pair from the other phones: If you have ever activated phone call notifications in the Amazfit app on another phone, go to that phone's Bluetooth setting and remove the Amazfit device. To do so, tap on the i icon next to the Amazfit and tap Forget this device. Toggle Bluetooth off and on. Re-open app and try connecting again.

Uninstall/Install mobile application:

iOS

- Hold down the app's icon for couple of seconds (hold until the icons start to wiggle).
- Tap the x in the top left corner of the app icon
- Tap delete
- Launch the App Store app
- Search and install the [Amazfit - Activity Tracker](#)
- Relaunch app again

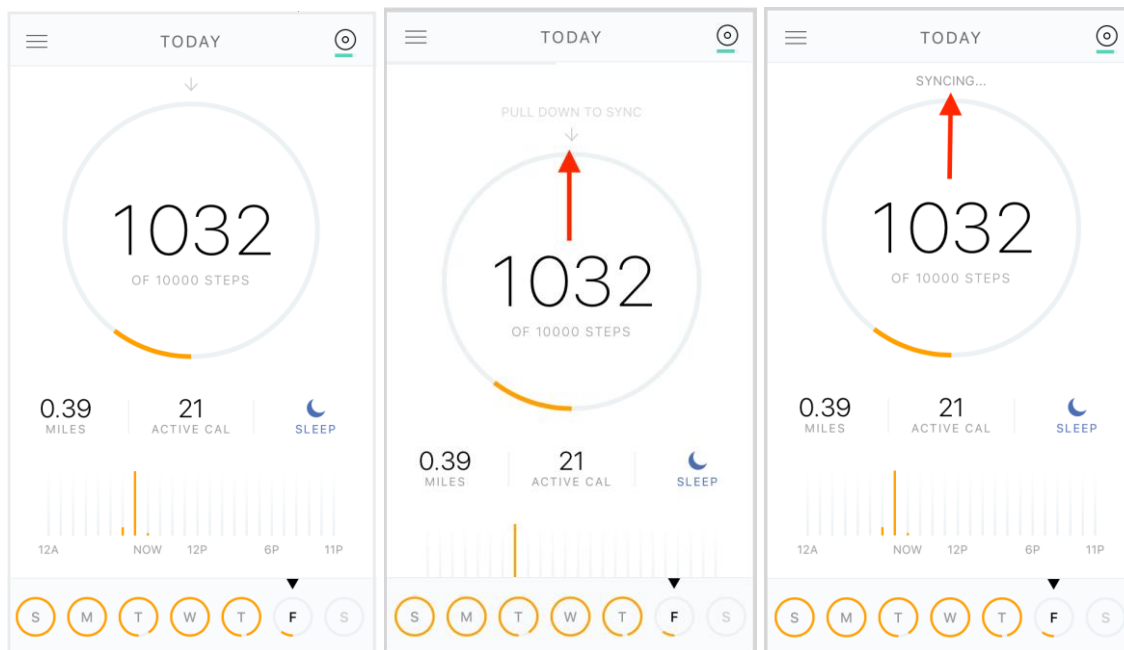

Android

- Open the Google Play Store app
- Tap the Menu --> My apps and games
- Tap the Amazfit application, then select Uninstall
- Return to the Google Play Store app and install [Amazfit - Activity Tracker](#)
- Relaunch app again

How do I sync the Amazfit tracker to my phone and how long will it take?

For iOS:

- Place your finger on the arrow toward the top of the home screen.
- Drag finger down and release.
- It will take 15-20 seconds for your device to sync data to your phone.
- Be sure to have your tracker in close range of your mobile device. We recommend having the tracker within an arm's length for data to successfully transfer to the app.

For **Android**: Your tracker data should automatically sync once you are inside of the app. It will take 15-20 seconds for your tracker data to sync to your phone.

Be sure to have your tracker in close range of your mobile device. We recommend having the tracker within an arm's length for data to successfully transfer to the app.
