

FEATURES

–

- Easy stack & snap assembly
- Unique, patent-pending design requires no difficult twisting & locking
- Simple function guide shows you which blade to use & which button to press

- Big Mouth® feed tube reduces pre-cutting
- Sealed bowl with pour spout prevents leaks
- Powerful 450 watt motor
- Reversible slice/shred disk
- Chopping S-blade
- Dishwasher safe blades, bowl, and lid
- BPA-free in all food zones
- Cord storage

The easiest food processor assembly ever

Gone are the days of complicated positioning and twisting the bowl and lid into place. With the Hamilton Beach® Stack & Snap™ Food Processor, the bowl is specially designed to fit directly on the base (with no twisting required) and the lid snaps securely to the bowl with simple locking clips for safe operation. No more guessing whether it's put together correctly, just “stack” and “snap” the parts into place!

The kitchen helper you'll use for every meal

Mix up a quick pancake batter. Chop onions without the tears. Puree a bowl of nutritious soup. Slice cucumbers evenly for a perfect salad. Chill, then shred or grate your favorite cheese for a variety of dishes.

Large feed chute means less prep work

Are you still pre-cutting all your ingredients? If you're doing that, why bother with a food processor at all? The Hamilton Beach® Stack & Snap™ 12 Cup Food Processor accommodates both large and small

ingredients, so you can spend less time pre-cutting your ingredients and more time enjoying them.

Unique bowl features

Many food processors come with a maximum liquid fill line, so if you are preparing soup you need to process multiple batches. The sealed bowl holds up to 12 cups of liquid, which reduces the need for multiple batches when processing soups or other liquids. Messy drips can be avoided with the built-in pour spout. A simple snap secures the lid on to the bowl, with no twisting and locking needed.

Includes everything you need

This powerful food processor comes with a 12 cup bowl, which is the ideal size for most of your home cooking needs. It also includes a reversible slice/shred disc and S-blade for chopping, mixing and pureeing. Cord storage in the back keeps things tidy when not in use.

Easy to use

Disc attachments are reversible and labeled, which takes the guesswork out of processing. The label should face up for the desired function. When using disc attachment, do not process foods past the MAX LEVEL indicator on the bowl.

Many processing options

Between the S-blade and the reversible slicing/shredding disc, you have many choices available. Use the S-blade for chopping nuts, meat, garlic, onions, peppers, celery, herbs, bread (for crumbs), and crackers. Also, use it to mince/puree vegetables and fruits, mix salad dressings, puree soups or sauces, and to grate cheese. Use the slicing disc (slicing side facing UP) to slice cucumbers, apples, mushrooms, carrots, potatoes, cabbage, tomatoes, pepperoni, peppers, radishes, firm cheeses. Use the shredding disc (shredding side facing UP) to shred cabbage, potatoes, carrots, and cheese.

Directions

Using the S-blade and with the processor running, drop onion, garlic clove and hot pepper through the food chute and chop until finely minced.

Add tomatoes, cilantro, cumin, lime juice, salt and pepper. Pulse until desired texture. Add hot sauce if desired

Serves 6 to 8
