

## How It Works

With the Livescribe™ 3 smartpen and the Livescribe+ mobile app, simply write on paper and watch it instantly appear on your tablet or smartphone. Your notes become infinitely more useful when they are tagged, organized, searchable, or even converted to text. Easily add recorded audio that's synced with your handwriting so you can relive important moments. Quickly share notes and ideas with friends, colleagues, and peers—all with just a few quick taps of your finger.

The Livescribe 3 smartpen Black Edition features a sleek, matte-black finish complemented by a glass-reinforced clip and a smooth writing experience that is sure to make this your new favorite pen! Along with the free Livescribe + mobile app (for iOS and Android), you will also get a 5" X 8" Starter Notepad, an ink cartridge, a capacitive stylus cap and micro-USB charging cable.

The Livescribe 3 smartpen is designed with the meticulous attention to detail that a premium writing instrument deserves. From the integrated stylus cap, down to the Swiss-made tungsten-carbide ballpoint ink cartridge, we've paid close attention to deliver an experience that is worthy of the title of your new favorite pen. But it is the amazing amount of technology packed inside the Livescribe 3 that really delivers the magic. Once you twist the ring to extend the ink cartridge, everything you write is captured by the infrared camera on the pen and stored on the smartpen's built-in memory. Simply connect your smartpen to your iOS or Android device and watch as all your notes are synced to the Livescribe+ mobile app.

## Livescribe+ Mobile App

Available on iOS and Android, Livescribe+ is the companion to the Livescribe 3 smartpen that's designed to quickly make your notes more useful. Livescribe+ makes it easy to integrate your notes with the rest of your mobile life:

- Create contacts, appointments and more from your handwritten notes
- Find what you need quickly with incredibly accurate handwriting search
- Convert your handwritten notes to text and use them in any doc or app
- Use easy sharing options to send notes to a variety of apps and services
- Record audio that syncs to your handwriting
