

Where is the model/serial number on my Philips shaver?

You can find the model number on the backside of your Philips shaver. For the serial number, check the backside, under the pop-up trimmer or in the hair chamber.

Serial number format

The serial number consists of 9, 6 or 5 digits.

- Format 9 digits: 5-YYWWD
- Format 6 digits: YYMMD
- Format 5 digits: YYWWD

Can I charge my Philips shaver after every shave?

Yes, you can recharge your shaver after every shave. The battery in your Philips shaver is a lithium-ion battery which allows you to recharge it every day.

Can I replace the battery of my Philips shaver?

Your Philips Shaver comes with a customized built-in battery. Do not try to replace the battery yourself. If you are having trouble charging your shaver read our [article](#) on this issue or contact us for further help.

Which foam or gel can I use with my Philips shaver?

You can use any type of shaving foam or gel available in the supermarket or drugstore with your wet and dry Philips Shaver. If you have sensitive skin, we advise you to use a shaving foam or gel for sensitive skin.

Does using a foam or gel effect my shaver's performance?

Wet shaving with foam or gel uses more energy and can thus drain your shaver's battery much faster. If you use your Philips Shaver for dry shaving only, the battery can last much longer.

Is it better to dry or wet shave with my Philips Shaver?

Both dry and wet shaving have their own advantages. It comes down to your personal choice of shaving. Some points to consider are as follows:

- Dry shaving can be done almost anywhere, even on the go, and there is hardly any cleaning involved.
- Wet shaving feels refreshing and is often beneficial for sensitive skin as it reduces friction and irritation caused by a blade.
