FAN CLEANING
Clear the fan grills, extender screen, and extender panels with a soft, damp cloth. Please use caution around the motor to prevent damage. Do not allow water or other electrical components to be exposed to water. Also, use a soft bristle brush attachment, a vacuum cleaner may be used to extract dust buildup on the grill areas.

NOTE:
- Remember to turn your fan to the off position prior to cleaning.

FAN SAFETY
PLEASE READ AND SAVE THESE IMPORTANT SAFEGUARDS

IMPORTANT INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or injury to persons, including the following:

1. Read all instructions before using the appliance.
2. To avoid fire or shock hazard, plug the appliance directly into a 120 V AC electrical outlet.
3. Keep the cord out of heated traffic areas. DO NOT let the cord hang over the edge of a table or counter. To avoid fire hazard, RETAIN the cord under rugs, near heat sources, and out of traffic areas.
4. To protect against electrical hazards, DO NOT immerse in water or other liquids. Do not use near water.
5. Gaze supervision is necessary when any appliance is used by or near children or disabled persons.
6. Always unplug the fan before moving it, putting on or taking off parts, cleaning, or whenever the fan is not in use. Be sure to pull by the plug and not the cord.
7. Avoid contact with moving parts. DO NOT operate any appliance with a damaged cord or plug. If motor fails to rotate, after the appliance malfunctions, or if it has been dropped or damaged in any manner. Return appliance to manufacturer for examination, electrical or mechanical adjustment, or repair.
8. DO NOT operate in the presence of explosive and/or flammable gases.
9. DO NOT allow water to drip on or enter into fan housing.
10. Use appliance only for intended household use as described in this manual. Any other use not recommended or sold by Bionaire® may cause hazards.
11. DO NOT use outdoors.
12. Always use on a dry, level surface.
13. Keep the window fan clear of heat from heated surfaces and open flames.
14. DO NOT attempt to repair or adjust any electrical or mechanical functions on the unit. Doing so will void your warranty. The inside of the unit contains no user serviceable parts. All servicing should be performed by qualified personnel only.

CONSUMER SAFETY INFORMATION

THE APPLIANCE IS A polarized AC plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet.

DO NOT ATTEMPT TO MODIFY THIS PLUG OR USE IN AN IMPROPERLY GROUNDED OUTLET.

READ ALL INSTRUCTIONS BEFORE USING THE APPLIANCE.

INSTALLATION INSTRUCTIONS

Step 1: Set the fan into your window opening.
Step 2: If the fan does not fit snugly to the top and bottom of the window, adjust the included extender panels and pull out the built-in extender screen until the fan fits safely in your window (See Figure 3).
Step 3: To keep the fan in place, carefully close the window so that the bottom edge of the window rests on the fan's edge on the top and bottom of your window. Always unplug the fan before cleaning.

NOTE: For slider windows, set the fan vertically in your window so that, with the left side on the bottom, the unit does not rest on the window at all times. Do not pull or put fan while it is in the window.

Installation guide

NOTE:
- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.
- Be sure to use a soft cloth moistened with a mild soap solution.
- Do not use gasoline, thinner or benzene as a cleaner.

OPENING THE WINDOW FAN INSTALLATION

The window fan has been designed to fit double-hung, slider and casement windows.

Step 1: Set the fan into your window opening.
Step 2: To turn the fan on press the Speed Control Button.
Step 3: To turn the Speed Control Button, press the Temp Set (+,–) buttons on the front of the Control Panel or use the remote control to program the desired temperature or switch to the manual mode.
Step 3: When you are finished setting the temperature, let the fan run for a minute before turning it off. Your window fan is equipped with a remote control. This remote control can be used to adjust the following functions: Temperature, Direction, Temperature adjustments.
Step 3: IMPORTANT: If the unit will not start in automatic mode, press the Auto On button on the front of the Control Panel and then return to displaying the current room temperature.

REMOTE CONTROL INSTRUCTIONS

Your window fan is equipped with a remote control. This remote control can be used to adjust the following functions: Power, Manual/Automatic mode, Air Flow Direction, Temperature adjustments.

CLEANING/MAINTENANCE INSTRUCTIONS

Follow these instructions to correctly and safely care for your fan. Please remember:

- Always unplug the fan before cleaning.
- Do not allow water to drip on or into fan housing.
- Be sure to use a soft cloth moistened with a mild soap solution.
- Do not use gasoline, thinner or benzene as a cleaner.

Automatic Operating Instructions

Your window fan is equipped with the digital control that automatically controls the fan by the room temperature. To turn the fan on:

Step 1: Set the speed to high, medium, or low by pressing the Speed Control Button.
Step 2: Set the flow direction to Exhaust, Intake (I) or exchange (one blade blowing air in and the other blade blowing air out) by pressing the Flow button.
Step 5: To tune the fan off press the Speed Control Button until the fan stops.
