

- **What is the impeller made of?**

The WG505 Trivac features a metal impeller to increase the mulching ratio to 16:1.

- **What kind of extension cord should I use?**

The right extension cord will ensure you get the performance you expect and will extend the life of your blower. Look for an extension cord rated for Outdoor Use and make sure the gauge of the cord is appropriate for the length you're using. The WG505 is a 12A tool, so check for gauge and length on the grid [here](#), or in your manual. Your local hardware or garden supply store will be happy to help you select the right cord to meet your needs.

- **What is the horsepower rating of the Worx TRIVAC 3-in-1 Blower / Mulcher / Yard Vacuum? How powerful is it?**

Horsepower rating is more accurately used to describe gas-powered tools. The Worx TRIVAC 3-in-1 Blower / Mulcher / Yard Vacuum has a power rating of 12A and reaches a no-load speed of up to 15,000 RPMs. With a max airflow of 350cfm, the Worx TRIVAC has the power to get the job done, whether the job is vacuuming fallen leaves, sweeping out the garage or drying off your car after washing it.
