- What the pros use... but what kind of pros?
- When a pro listens to music... well, they sometimes listen on a bad speaker to make sure it's all mixed right. Did you know that? Because the truth is, 90% of the world is going to listen to that cutting-edge music while listening to engine noise with the windows down

# Instruction Manual

and yelling at their friend in the car next to them HAY YOU GOTTA HEAR THIS SONG I JUST DOWNLOADED IT'S FIRE. This means the pros have to make music for people who aren't truly listening to music. Which is why so many songs have too much bass and get kinda clippy when you crank the volume. Such is life.

- However, if you're not a pro, you can do whatever you want, because you're not trying to get paid! And if what you want is to enjoy what you've paid for, you could do worse than get a pair of these Audio-Technica headphones. They'll let you hear the smooth notes in the low end, the happy notes in the top end, and cover all the bases from prog rock to prog classical to prog hip hop to prog country to prog ambient to low-fi prog, which, if you ask us, is going to be the very next thing. It's all about unicorns who work day jobs but at night practice wizardry. Seriously, you're gonna love the Moog solos on Side Six. Just heavenly.
