

# 3-Way Mount Use Cases

The 3-Way Mount is very versatile mount that has the following uses:

- Filming oneself “Selfing” during action sports
- Filming others
- Filming over crowds (using articulating joints)
- Tripod for stable platform for photography/time lapse
- Handle for hand held filming including water activities

Using the extended arm the camera can be positioned closer to the action. Examples include, but are not limited to:

- Close up filming of animals when diving/snorkeling
- Close up shots of a buddy who’s skiing/snowboarding/skating

**Note:** The mount is waterproof (to approx. 10m) and comprised of plastic and metal hinge/fastener components. You should rinse components after use in water and ensure they dry fully before storage for longest product life.
