TROUBLESHOOTING STEPS

1. Insert the USB cable into another USB port of the computer.
2. If you were using a USB hub, try connecting the keyboard directly with your computer.
3. Mechanical keyboard may require more power to run, it would be better to plug it into USB ports locating on the back of the chassis instead of those on the front
4. Check USB hub for foreign objects or dust
5. Unplug and reinsert the USB connector
6. Make sure that the function shortcuts are mapped correctly in your operating system's control panel.
7. Restart the computer.
